

What Makes a Dad

*God took the strength of a mountain,
The majesty of a tree,
The warmth of a summer sun,
The calm of a quiet sea,
The generous soul of nature,
The comforting arm of night,
The wisdom of the ages,
The power of the eagle's flight,
The joy of a morning in spring,
The faith of a mustard seed,
The patience of eternity,
And the depth of a family need.*

*Then God combined these qualities.
As there was nothing more to add,
He knew that His masterpiece was complete.
He called it **Dad**.*

philosophy from poetry to history works of all kinds emerged from and through the social hierarchy that was a fundamental fact of everyday life Paying attention to it changes how we might understand and interpret the works themselves whether canonical and familiar or largely forgotten But a second related fact is much overlooked too works also often emanated from families not just from individuals Families were driving forces in the production that is in the composing editing translating or publishing of countless works Relatives collaborated with each other edited each other or continued the unfinished works of deceased family members some imitated or were inspired by the works of long dead relatives The reason why this second fact about families is connected to the first about social hierarchy is that families were in the period a basic social medium through which social status was claimed maintained threatened or lost So producing literary works was one of the many ways in which families claimed their place in the social world The process was however often fraught difficult or disappointing If families created works as a form of socio cultural legacy that might continue to benefit their future members not all members benefited equally women sometimes produced or claimed the legacy for themselves but they were often sidelined from it Relatives sometimes disagreed bitterly about family history identity not least religious and so about the picture of themselves and their family that they wished to project more widely in society through their written works whether printed or manuscript So although family was a fundamental social medium out of which so many works emerged that process could be conflictual as well as harmonious The intertwined role of family and social hierarchy within literary production is explored in this book through the case of France from the late fifteenth to the mid seventeenth century Some families are studied here in detail such as that of the most widely read French poet of the age Cl ment Marot But the extent of this phenomenon is quantified too some two hundred families are identified as each containing more than one literary producer and in the case of one family an extraordinary twenty seven
