*Companion Guide to the Royal Castle in Warsaw*, 1980-01-01      **A Companion Guide to the Royal Castle in Warsaw**  
Jerzy Lileyko, 1980      **Survivors** Jadwiga Biskupska, 2022-02-17 Survivors tells the harrowing story of life in Warsaw under Nazi occupation As the epicenter of Polish resistance Warsaw was subjected to violent persecution the ghettoization of the city s Jewish community the suppression of multiple uprisings and an avalanche of restrictions that killed hundreds of thousands and destroyed countless lives In this study into the unique brutality of wartime Warsaw Jadwiga Biskupska traces how Nazi Germany set out to dismantle the Polish nation and state for long term occupation by targeting its intelligentsia She explores how myriad resistance projects emerged within the intelligentsia who were bent on maintaining national traditions and rebuilding a Polish state In contrast to other studies on the Holocaust and Second World War this book focuses on Polish behavior and explains who was in a position to contest the occupation or collaborate with it while answering lingering questions and addressing controversies about the Nazi empire and the Holocaust in Eastern Europe      **Authentic Reconstruction** John Bold, Peter Larkham, Robert Pickard, 2017-12-14 Notions of authenticity lie at the heart of many questions about heritage and identity in the built environment These questions are most pertinent when buildings have been destroyed in disaster or war and the built fabric is being reconstructed to reinstate traditional or historic appearances in place of what was lost Authentic Reconstruction examines this idea of reconstruction using it as a prompt to examine a range of deeper issues on heritage and the built environment From post WWII reconstruction programmes through to the rebuilding of historic cultural landscapes lost in natural disasters this collection of essays by heritage specialists provides a wide range of case studies and discussions Each presents responses to crises and lessons learned in order to extrapolate general guidelines for future actions by politicians architects and planners in reconstructing buildings The book also looks beyond disaster and war noting how authenticity bears on political intentions and image building exploring how reconstruction is used to tell a political or historical story so conditioning the ways in which the built environment is perceived and appreciated by its users This is not just about the buildings as bricks and mortar but about perceptions of identity and the social and historical values which buildings and spaces embody for a richly diverse population This book will be valuable to all who are concerned with heritage as practitioners or consumers particularly those concerned with reconstruction and the creation of authentic places and experiences architects architectural historians town planners preservationists conservationists and those involved in heritage management and material culture      **Toward a Geography of Art** Thomas DaCosta Kaufmann, 2004-03-14 Art history traditionally classifies works of art by country as well as period but often political borders and cultural boundaries are highly complex and fluid Questions of identity policy and exchange make it difficult to determine the place of art and often the art itself results from these conflicts of geography and culture Addressing an important approach to art history Thomas DaCosta Kaufmann s book offers essays that focus on the intricacies of

accounting for the geographical dimension of art history during the early modern period in Europe Latin America and Asia Toward a Geography of Art presents a historical overview of these complexities debates contemporary concerns and completes its exploration with a diverse collection of case studies Employing the author s expertise in a variety of fields the book delves into critical issues such as transculturation of indigenous traditions mestizaje the artistic metropolis artistic diffusion transfer circulation subversion and center and periphery What results is a foundational study that establishes the geography of art as a subject and forces us to reconsider assumptions about the place of art that underlie the longstanding narratives of art history
