A Cosmic On The Mechanics Of Creation:

A Cosmic Book on the Mechanics of Creation Itzhak Bentov, Mirtala Bentov, 1982 Starting with the idea of the universe as hologram Bentov imaginatively shows how some of today's myth shattering scientific realities could lead us to the Creator Him Herself from lower cover *A Brief Tour of Higher Consciousness* Itzhak Bentov, 2000-04 Anyone interested in the inner reaches of the mind the greater structure of the cosmos and the spiritual evolution of humanity will find this book an informed and delightful read Bentov explains the Kabbalistic principles of number and sound the meaning of cosmic symbols and ultimately shows that the universe and thought are inseparable **Evolution** Somnath Bhattacharyya, 2023-09-29 This book reconceptualizes the ancient philosophy of dualism and a trinity applied to classical and quantum nonequilibrium phenomena In addition to classical mechanics and electrodynamics a remarkable connection of this philosophy with quantum mechanics is established which can be useful for quantum computing and the development of quantum artificial intelligence Packed with the recent theoretical models quantum simulations of black holes and experimental observations of quantum phase transitions this book brings a holistic approach that can be useful to refine the concept of the Creation i e the evolution of the Universe from the condensed state of matter and explain the artificial vision The approach is Unique Connects ancient philosophy classical and quantum mechanics materials and the latest quantum technologies Novelty High level of scientific interpretation of ancient philosophy creation interactions and disorder Multidisciplinary Guides students to learn quantum simulations and develop philosophical ideas The book contains over ten years of in depth research by the author on the ancient eastern Indian philosophy and the latest scientific research in condensed matter and quantum technology This book will simplify the picture of ancient eastern philosophy which can be read by the general audience particularly undergraduate postgraduate students interested in quantum information science without any mathematical treatment However some parts of the book will be ideal for senior academicians and professional researchers in both worlds *National Union Catalog* , Includes entries for maps and atlases **Bridging Faith and Reason: Apologetics Beyond Concordism, Anachronism, and Scientism** Dr. Octavian Caius Obeada, *Bridging Faith and Reason Apologetics Beyond Concordism Anachronism and Scientism* is a bold and thoughtful journey into the heart of modern Christian apologetics In a world where faith and science often seem at odds this book offers a refreshing invitation to move beyond forced harmonizations and engage both Scripture and science on their own terms Drawing on theology philosophy and cultural analysis the author critiques simplistic concordism warns against reading modern science into ancient texts and dismantles the illusion of scientism as the sole path to truth Instead the book champions a humble and intellectually honest apologetic method one that honors the literary richness of Scripture and the provisional nature of scientific inquiry Whether you are a skeptic seeker or believer this book offers a compelling vision of Christian faith as a dynamic thoughtful and deeply human pursuit of truth Discover how apologetics can become a bridge not a barrier between reason and revelation This beautifully written book gives the reader a

deep philosophical dive into the interactions between theology and science The author presents thorough discussions of the complex ways that these disciplines have influenced conflicted with and reinforced each other over history and in the present He presents a comprehensive and enlightening view of concordism anachronism and scientism as dangers to be avoided and describes worldviews that treat philosophy theology and science as valid and valuable contributions to human knowledge and the understanding of reality A valuable resource for anyone interested in the details of the philosophical dynamics between science and faith

Sy Garte Ph D Biochemist Author of *The Works of His Hands A Scientist's Journey from Atheism to Faith* A significant portion of the modern intellectual world rests on the unsupported foundation of scientism the typically self-serving notion that knowledge is gained only through science Yet what laboratory experiment demonstrated that In fact scientism is a parasite that feeds off the prestige of real working science It is a terrible philosophy with no answers for the most profound questions that tug on the human heart In his latest book Dr Octavian Caius Obeada takes the measure of scientism and shows the way to a balanced fruitful understanding of the relationship between faith and reason

Michael J Behe author of *Darwin's Black Box* Martin Luther reportedly compared human nature to a drunken man on horseback who if he doesn't fall off on one side he'll fall off the other what he lacks is balance Balance is also hard to find in much contemporary thinking about theology philosophy science and how they are related to each other This fine volume by Dr Octavian Caius Obeada provides an important counterexample to this tendency a thorough fair historically informed and carefully argued account of faith reason and science that does justice to each and relates them in a balanced and fruitful way This will be a helpful resource for anyone hoping to stay on the saddle in this important but contested area I recommend it highly

David A Horner D Phil Oxford Professor of Theology and Philosophy Talbot School of Theology Biola University In *Bridging Faith and Reason* Dr Caius Obeada offers a rigorous and balanced exploration of how Scripture and science can be engaged without distortion or reduction With intellectual clarity and deep conviction he challenges both concordist shortcuts and scientific reductionism pointing instead to a more faithful apologetic of our faith grounded in humility and truth Having read this work I am encouraged by the way Dr Obeada equips believers pastors and even theologians to think critically to honor God's Word and to engage our culture with confidence and grace This book is an important contribution to the ongoing dialogue between faith theology and the sciences

Sergiu M Br dean Pastor First Romanian Baptist Church Windsor Ontario This book offers a fresh and important perspective on the relationship between faith and science The author emphasizes that this relationship is not a battleground but rather a place of rich dialogue and shared wonder Throughout this book the central argument is that apologetics is not about transforming theology into science or vice versa Rather it is about building bridges finding how the revelations of modern science can coexist with the timeless truths of the Bible It is about holding together the human inquiry and the mystery of divine revelation In doing so the author is inviting both believers and skeptics into a deeper conversation about faith and science

Rector Conf Univ Dr Daniel Mari Institutul Teologic Baptist Bucure ti I very much welcome author's
