Eugenical News, 1923 Law and Kinship in Thirteenth-Century England Sam Worby, 2015 First comprehensive survey of how kinship rules were discussed and applied in medieval England Two separate legal jurisdictions concerned with family relations held sway in England during the high middle ages canon law and common law In thirteenth and fourteenth century Europe kinship rules dominated the lives of laymen and laywomen They determined whom they might marry decided in the canon law courts and they determined from whom they might inherit decided in the common law courts This book seeks to uncover the association between the two exploring the ways in which the two legal systems shared ideas about family relationship where the one jurisdiction the common law was concerned about ties of consanguinity and where the other canon law was concerned to add to the kinship mix ties of affinity It also demonstrates how the theories of kinship were practically applied in the courtrooms of medieval England SAM WORBY is a civil servant and independent scholar

Twenty-two Years Stephen A. Richardson, Helene Koller, 1996 Twenty Two Years presents the results of a unique longitudinal study of the first 22 years in

the lives of more than 200 young people with varying degrees of mental retardation By following their paths through available services job histories leisure activities friendships and marriages the authors provide objective information about the quality of life of young people with mental retardation The book makes a unique contribution by determining what factors in childhood predict who will and who will not require mental retardation services and for those who disappear from services why some fare better than others Most important the results help answer a question that haunts parents What will happen when my child grows up This study expands on an internationally acclaimed clinical and epidemiological study of children with mental retardation published in 1970 It provides prevalence rates by severity of mental retardation gender social class and family stability and shows how these change over time The authors confirm the central role of biomedical factors in the etiology of severe mental retardation For the etiology of mild mental retardation the book examines the relative contributions of biomedical and intergenerational genetic factors as well as psychosocial adversity The book should be of interest to a broad range of clinicians researchers and students as well as the families of people with mental retardation and it will serve as a model for future epidemiological and follow up research
