A Field Guide To Australian Birds Volume 2 Passerines:

Field Guide to Australian Birds Peter Slater, 1984 **Bird Voices** Barbara Campbell, 2019 **A Field Guide to Australian Birds: Non-passerines** Peter Slater, 1971 **Biogeography and Ecology of New Guinea** J.L. Gressitt, 2012-12-06

J L Gressitt New Guinea is a fantastic island unique and fascinating It is an area of incredible variety of geomorphology biota peoples languages history traditions and cultures Diversity is its prime characteristic whatever the subject of interest To a biogeographer it is tantalizing as well as confusing or frustrating when trying to determine the history of its biota To an ecologist and to all biologists it is a happy hunting ground of endless surprises and unanswered questions To a conservationist it is like a dream come true a flash back of a few centuries as well as a challenge for the future New Guinea is so special that it is hard to compare it with other islands or tropical areas It is something apart with its very complicated history chapters I 2 4 II 1 4 III I VI I 2 It is partly old but to a great extent very young yet extremely rich and complex It has biota of different sources to such a degree that it is still disputed in this volume as to what Realm it belongs to the Palearctic or Neotropical Australian or what Region Oriental Oceanic Papuan or Australian The terms Papuan Indo Australian and Australasian also have been applied to the area

Sunbirds of the World Robert A. Cheke, Clive F. Mann, 2025-06-12 This is a gorgeous book about some of the world's most gorgeous birds JARED DIAMOND Sunbirds are among the most striking of all bird groups their dazzling iridescent plumage and long curved bills are conspicuous when the birds visit garden flowers on sunny days to feed on nectar Some species especially the females are duller in appearance and harder to spot feeding mostly on insects high up in forest canopies Spiderhunters as their name suggests feed extensively on spiders while sunbirds other close relatives the flowerpeckers are especially partial to mistletoe berries This book is the last word on sunbird identification ecology and behaviour Now in its second edition it has been fully revised and updated to reflect the many developments that have occurred in sunbird taxonomy as well as the new research that has been published on their biology It covers all 218 currently recognised species providing details of key identification features voice habitat distribution conservation status movements food and behaviour New colour art by award winning artist Richard Allen has been added and hundreds of high quality colour photographs beautifully capture every species Maps accurately depict geographical distributions of each taxon to subspecies level This beautiful book is the definitive reference to the sunbirds flowerpeckers spiderhunters and sugarbirds of the world and is essential reading for researchers birders and conservationists alike

Feather and Brush Penny Olsen, 2001 This volume traces the 300 year history of bird art in Australia from the crudely illustrated records of the earliest European voyages of discovery to the diversity of artwork available at the start of the 21st century It is a history inseparable from the development of Australian ornithology Against a background of establishment of the country itself naval draftsmen convicts officers settlers naturalists artists and scientists alike contributed both to the art and to science
