**A New History of German Literature** David E. Wellbery, Judith Ryan, Hans Ulrich Gumbrecht, 2004 A New History of German Literature offers some 200 essays on events in German literary history **Seelenarbeit an Deutschland**, 2016-08-09 The last decade has undoubtedly been the most controversial in the long literary career of Martin Walser This volume presents a review of this career going far beyond short lived arguments to present an insightful overview of much of his work It considers not only major aspects of his writing covering both his literary beginnings and the most recent works but also different previously neglected features of his persona and his writing namely his activity as a university teacher and his art criticism In addition fruitful comparisons are made with other writers such as Proust Grass and Uwe Johnson At the same time recent controversies are also considered with major attention being paid to Walser s public speeches and those works of fiction which have been seen by some as demanding the end of German self recriminations over the Nazi past This volume is unique in that much space is devoted to both sides of the argument It will provide stimulating reading to all those interested in Germany and German literature **German Culture and the Uncomfortable Past** Helmut Schmitz, 2017-07-05 Beginning with the question of the role of the past in the shaping of a contemporary identity this volumes spans three generations of German and Austrian writers and explores changes and shifts in the aesthetics of Vergangenheitsbewältigung coming to terms with the past The purpose of the book is to assess contemporary German literary representations of National Socialism in a wider context of these current debates The contributors address questions arising from a shift over the last decade triggered by a generation change questions of personal and national identity in Germany and Austria and the aesthetics of memory One of the central questions that emerges in relation to the Hitler youth generation is that of biography as examined through Günter Grass and Martin Walser s conflicting views on the subject of National Socialism Other themes explored here are the conflict between the post war generations and the contributions of that conflict to West German mentality and the growing historical distance and its influence on the aesthetics of representation German Literature in the Age of Globalisation Stuart Taberner, 2004-11-01 Literary fiction in Germany has long been a medium for contemplation of the nation and questions of national identity From the mid 1990s in the wake of heated debates on the future direction of culture politics and society in a more normal united country German literature has become increasingly diverse and seemingly disparate at the one extreme it represents the attempt to reinvent German traditions at the other the unmistakable influence of Anglo American forms and pop literature A shared concern of almost all of recent German fiction however is the contemporary debate on globalisation its nature impact and consequences for local culture In its engagement with globalisation the literature of the Berlin Republic continues the long established practice of reflection on what it is to be German This book investigates literary responses to the phenomenon of globalisation The subject is approached from a wide range of thematic and theoretical perspectives in twelve chapters which taken together also provide

an overview of German fiction from the mid 1990s to the present The book serves both as an introduction to contemporary German literature for university students of German and as a resource for scholars interested in culture and society in the Berlin Republic
