

# Das Rittertum

**W. H. Jackson**

## Das Rittertum:

**Courtly Culture** Joachim Bumke, 1991-01-01 Every aspect of courtly culture comes to life in Joachim Bumke's extraordinarily rich and well documented presentation. A renowned medievalist with an encyclopedic knowledge of original sources and a passion for history, Bumke overlooks no detail from the material realities of aristocratic society: the castles and clothing, weapons and transportation, food, drink and table etiquette, to the behavior prescribed and practiced at tournaments, knighting ceremonies and great princely feasts. The courtly knight and courtly lady and the transforming idea of courtly love are seen through the literature that celebrated them, and we learn how literacy among an aristocratic laity spread from France through Germany and became the basis of a cultural revolution. At the same time, Bumke clearly challenges those who have comfortably confused the ideals of courtly culture with their expression in courtly society. *Chivalry in Twelfth-century Germany* W. H. Jackson, 1994 The first book in English to cover the whole production of Hartmann von Aue (fl. 1180-1203), a figure of paramount importance in the history of medieval German literature. His book is refreshing and full of stimulating ideas. MEDIUM AEVUM First full scale exploration of knighthood and chivalric values in poems of key figure in 12c German literature. Hartmann von Aue Concerned principally to situate Hartmann's works in their social and cultural historical context. Jackson's carefully constructed and lucidly written book will be required and compelling reading at every level of interest, from undergraduate student to specialist scholar. It expounds knighthood as the major theme of Hartmann's varied oeuvre, reflected and refracted through the prism of different genres, fictional material and narrative positions. Jackson's unrivalled grasp of the historical evidence for the material, social and ideological dimensions of chivalry in the twelfth century is brought to bear on the texts in a way which never reduces these to mere functions of an extra-literary reality, but brings out the subtle and dynamic interplay of their aesthetic patterns and documentary correlatives. The book also builds up a persuasive framework for understanding Hartmann's literary production as a whole, and for grasping it as an evolving reflection of and on knighthood as the key mode and model of social self-realisation for his chivalric audience. FORUM FOR MODERN LANGUAGE STUDIES Hartmann von Aue is a major figure in medieval German literature, and his works document key features of the history of chivalry in an important phase of transition and consolidation. This book is the first full scale enquiry undertaken of the presentation of the role of knighthood across the full range of Hartmann's works, considering the social, ideological and literary dimensions of chivalry, and fruitfully combining literary, linguistic and historical approaches. The opening chapters place Hartmann's works in the broader perspective of Arthurian literature and of kingship and chivalry in western Europe, and in the context of the changing historical reality of knighthood as a military and a social order in twelfth century Germany. Further chapters are devoted to each of his works: Erec, Gregorius, the Klage and his lyrics, Der arme Heinrich and Dwein, which are interpreted both with a historical *Knighthood and Society in the High Middle Ages* David Crouch, Jeroen Deploige, 2020-11-30 In popular imagination few phenomena are as strongly associated with medieval society

as knighthood and chivalry At the same time and due to a long tradition of differing national perspectives and ideological assumptions few phenomena have continued to be the object of so much academic debate In this volume leading scholars explore various aspects of knightly identity taking into account both commonalities and particularities across Western Europe Knighthood and Society in the High Middle Ages addresses how between the eleventh and the early thirteenth centuries knighthood evolved from a set of skills and a lifestyle that was typical of an emerging elite habitus into the basis of a consciously expressed and idealised chivalric code of conduct Chivalry then appears in this volume as the result of a process of noble identity formation in which some five key factors are distinguished knightly practices lineage crusading memories gender roles and chivalric didactics
