

4.1, on p. 97 in *Inconspicuous*). Schilek and Edwards had no such thing in mind! This means that Fig. 4.1 is garbled. The aquatic charophytes are shown as ter-  
restrial; the terrestrial bryophytes, whose aquatic members are secondarily aquatic, and the sphenop-  
sids are shown as wholly aquatic in the Silurian and Devonian, while neither the rhynioids nor lycopsids  
have terrestrial records until sometime in the Devo-  
nian. The publication date of the Schilek and Ed-  
wards paper is correctly cited in the bibliography  
(1990); the figure caption cites the publication date  
as 1989.

Among the problems is that none of the authors  
have played seriously in the field of pre-Carbonifer-  
ous geology or paleontology, nor dealt with ques-  
tions that intimately bear on early terrestrialization  
and early ecosystem evolution, nor even with some  
of the major groups of organisms that make up that  
fossil record, e.g. arthropods and embryophytes. A  
perusal of the bibliography shows no original re-  
search papers on the question of early terrestrializa-  
tion attributed to this trio. In fact their names scarcely  
appear in the bibliography at all. Only four refer-  
ences, all peripherally related to the subject of the  
text, can be attributed to Gordon and Olson.

This lack of direct involvement in the issues of  
this book effectively means that the knowledge they  
bring to this area is all second hand. While this may  
not be a handicap for a popular or semipopular book,  
nor even a textbook, I regard it as a potential liability  
in a serious, scholarly work. Acknowledgements in  
the preface make it clear that no individuals who  
work in this area were asked to review chapters for  
completeness and accuracy.

It is easy for the specialist to nitpick and there is a  
great deal to nitpick about in this book. *Inconspicuous* is  
full of minor errors (incomplete references in the  
bibliography; misattributed figures, e.g. Fig. 3.16 on  
p. 88 is erroneously attributed to Schilek and Ed-  
wards; Fig. 4.17 on p. 89 to Channer and Sheerin  
— the reverse is true), major mistakes (as noted  
above), misstatements, woolly interpretations and mis-  
representation of facts. In those parts of the book  
within my professional purview, examples filling  
into all these categories are copious enough that I  
remain skittish with regard to the scholarship in  
those chapters and sections in which I have no  
expertise. The numerous problems with regard to the

treatment of the fossil arthropods described by Shein  
(*Nature*, vol. 373, p. 271) supplement my comments  
in one such area.

Looked at most generously, *Inconspicuous* serves sev-  
eral useful purposes for those with peripheral inter-  
ests in this area: it provides a bibliography for some  
of the principle sources that is more or less current  
through 1997. It attracts the attention of a broader  
scientific public than would normally be concerned  
with such issues to an important evolutionary ques-  
tion and notes contributions of some of the major  
players.

But because of lack of rigorous scholarship, use  
information from this book with the utmost care.  
Anyone more than peripherally interested in this  
research area should go to the original literature, take  
note of the assertions with a grain of salt and look  
sceptically at the illustrations. Specifically, for any-  
one wanting information about the contribution of  
the fossil record to the question of terrestrialization, I  
cannot recommend chapters that deal with the fossil  
record. As one who has spent much of the past 20  
years concerned with the origin of terrestrial plants, I  
find so much that is confused, misleading and mis-  
taken in *Inconspicuous* that it indicates that we should all  
consider our own forays into unfamiliar literature  
and scholarship where any of us may be equally  
guilty of similar blunders.
