his subject the human body and from then on it remained his principal theme But he did not paint from life Instead he appropriated images from the mass media that he manipulated into his studies His paintings bore witness to the shattered psychology of the time and shot him to a prominence that hardly diminished over the next fifty years and that continues to rise This book presents many of the working documents about which Bacon was entirely secretive but which it emerges were integral to his creative process Culled from thousands of pieces of original material found in his studio including newspapers magazines books and photographs these items have each been exhaustively and minutely researched providing for the first time comprehensive details of the artist s sources Nearly all previously unseen these visually thrilling documents demonstrate Bacon s unerring eye for seeking out visual stimulation in the most unexpected places His paintings emerged from a dialogue between great art of the past photographic imagery of the present and early cinema This unique selection of material thoroughly researched meticulously documented and compellingly presented will provide an invaluable insight into both the artist s work and working methods
