David Bakan On Method:

Sigmund Freud and the Jewish Mystical Tradition David Bakan, 2024-10-08 2024 Hardcover Reprint of the 1958 Edition Full facsimile of the original edition and not reproduced with Optical Recognition Software In this pioneering work David Bakan challenges the popular view of Freud as an entirely secular intellectual schooled in modern culture rather than Jewish traditions Bakan contends that the father of psychology was profoundly influenced by mystic lore about which he appeared to know very little and which represents the antithesis of scientific method This work is based on the premise that Freudian psychoanalytic theory is largely rooted in the Jewish religion particularly the mysticism of the kabbala In a fascinating interpretation of the blend of personality and cultural history Bakan explains how Freud's Jewish heritage contributed either consciously or unconsciously to his psychological theories The author employs Freud's own distinction between being a Jew and the acceptance of Jewish doctrine to demonstrate the effect of Jewish mysticism in the formation of Freud's technical genius With its focus on the ways in which Freud was and was not Jewish this study offers a model example of the problem of Jewish identity as embodied by one of the giants of modern science who professed to be both infidel and Jew Amazon com Contents The problem of the origins of psychoanalysis Hypotheses relating the origins of psychoanalysis to Freud's personal life Psychoanalysis as a problem in the history of ideas Anti semitism in Vienna The general question of dissimulation Did Freud ever dissemble Freud's positive identification as a Jew Freud's relationship to Fliess and his other Jewish associates Early Kabbala Modern Kabbala The Zohar The Chmielnicki period Jewish self government The Sabbatian episode The Frankist episode Chassidism The Moses of Michelangelo Some relevant biographical items Moses and Monotheism a book of double content Moses as an Egyptian Moses was killed by the Jews Freud's messianic identification Introduction The transition The hypnosis and cocaine episodes The discovery of the transference The Flectere of the interpretation of dreams Freud's paper on demoniacal possession The composition of the interpretation of dreams Accretion of meanings to the devil image The problem of scholarship Techniques of interpretation Sexuality Heimlichkeit

Ford Methods and the Ford Shops Horace Lucian Arnold, Fay Leone Faurote, 2024-07-17 In *Ford Methods and the Ford Shops* Horace Lucian Arnold and Fay Leone Faurote provide a comprehensive and detailed exploration of the innovative production techniques and organizational practices that revolutionized the automotive industry This seminal work offers an in depth look at the methods that made the Ford Motor Company an industrial powerhouse and a symbol of modern manufacturing efficiency The book meticulously documents the pioneering assembly line techniques introduced by Henry Ford which dramatically increased productivity and lowered costs Arnold and Faurote delve into the various aspects of Ford's production system from the design of specialized machinery and tools to the layout and operation of the assembly line itself Key themes include The Assembly Line The authors provide a detailed analysis of the assembly line process explaining how it transformed manufacturing by breaking down complex tasks into simple repetitive actions This innovation not only sped up production

but also made it possible to produce affordable automobiles for the masses Standardization and Efficiency Arnold and Faurote explore the importance of standardization in Ford's production methods They discuss how interchangeable parts and standardized processes contributed to efficiency and quality control Workforce Management The book examines Ford's approach to workforce management including the introduction of higher wages and shorter working hours These practices not only improved worker satisfaction but also increased productivity and reduced turnover Business Philosophy Ford Methods and the Ford Shops also delves into Henry Ford's broader business philosophy emphasizing his belief in making products affordable and accessible while maintaining high standards of quality and efficiency This detailed and insightful book is a valuable resource for students of industrial engineering business professionals and anyone interested in the history of manufacturing Arnold and Faurote's comprehensive account of Ford's methods provides a fascinating look at the principles and practices that reshaped the industrial landscape and set new standards for efficiency and innovation

Psychoanalytic Approaches to Myth Daniel Merkur, 2005-07-05 This book surveys the history of psychoanalytic treatments of myths variously as symptoms of psychopathology as cultural defense mechanisms and as metaphoric expressions of ideas that may include therapeutic insights *The Bible in Human Transformation* Walter Wink, 2010-01-19 Historical biblical criticism is bankrupt That startling affirmation began *The Bible in Human Transformation* when it first appeared in 1975 Wink asserts that despite the valuable contributions of the historical critical method we have reached the point where this method is incapable of allowing Scripture to evoke personal and social transformation today More than thirty years later Wink now looks back in a new preface over the more and less humanizing developments in New Testament studies of the last few decades and renews his call for a transforming approach to biblical interpretation [History of Psychology in Autobiography](#) Leendert P. Mos, 2009-06-12 Since the 17th century autobiography has an honorable place in the study of history In 1930 the preeminent historian of psychology Edwin Boring writes that a science separated from its history lacks direction and promises a future of uncertain importance To understand what psychology is and what it is becoming the autobiographies of famous psychologists is history at its best Here we find model inquirers of the science who offer a personalized account of themselves and their vocation in the context of the history of the science What is characteristic of many of those who have contributed to an alternate vision of psychological science is that they never considered themselves or were considered by others as belonging to the mainstream of the discipline In considering an alternative history of psychology in autobiography the editor invited contributors whose research and writings have pushed the discipline in other directions pushed its limits and whose scholarship finds its philosophical framework outside the discipline altogether If these contributors may not be model inquirers their scholarship is very much a matter of consequence for those who wish to understand psychology Among the outliers included here are those who devoted themselves to the writing of psychology examining its history theories research and professional practices and who enthusiastically embraced

over the course of their lives the discipline as a human science Their influence has been subtle as has been their appeal to many students who affection for the discipline finds its promise in a discerning self awareness and a critical understanding of others and their worlds This volume is not simply a collection of personal chronologies which might inspire or lend appreciation to a younger generation Our contributors write from their personal and professional experience of course but they write of their thinking and understanding of the psyche as an aspect of human life of psychology as an academic form of human sciences inquiry and so bring to bear their scientific and philosophical imagination to their personal challenges in their chosen vocation as psychologists Our contributors cover a broad swath of the second half of the 20th century the century of psychology Nurturing the discipline from within various philosophical social political and cultural roots their autobiographies exemplify marginality if not alienation from the mainstream even as their professional and personal lives give expression to engaged scholarship commitment to vocation and straightforwardly and reflectively a love of the heart From Germany Carl Graumann from France Erika Apfelbaum from Canada David Bakan and Kurt Danziger and from the United States Amedeo Giorgi Robert Rieber and Joseph Rychlak relate their lives to the larger contexts of our times Their personal stories are an integral part of the historiography of our discipline Indeed a contribution to historiography of our discipline is constituted in their autobiographical self presentations for their writings attest as much to their lives as model inquirers as they do to the possibility of psychology as a human science Inference, Method and Decision R.D.

Rosenkrantz, 2012-12-06 This book grew out of previously published papers of mine composed over a period of years they have been reworked sometimes beyond recognition so as to form a reasonably coherent whole Part One treats of informative inference I argue Chapter 2 that the traditional principle of induction in its clearest formulation that laws are confirmed by their positive cases is clearly false Other formulations in terms of the uniformity of nature or the resemblance of the future to the past seem to me hopelessly unclear From a Bayesian point of view learning from experience goes by conditionalization Bayes rule The traditional stumbling block for Bayesians has been to find objective probability inputs to conditionalize upon Subjective Bayesians allow any probability inputs that do not violate the usual axioms of probability Many subjectivists grant that this liberality seems prodigal but own themselves unable to think of additional constraints that might plausibly be imposed To be sure if we could agree on the correct probabilistic representation of ignorance or absence of pertinent data then all probabilities obtained by applying Bayes rule to an informationless prior would be objective But familiar contradictions like the Bertrand paradox are thought to vitiate all attempts to objectify ignorance Building on the earlier work of Sir Harold Jeffreys E T Jaynes and the more recent work of G E P Box and G E Tiao I have elected to bite this bullet In Chapter 3 I develop and defend an objectivist Bayesian approach **Social Science Methods for Psychodynamic Inquiry**

William R Meyers, 2016-02-06 This book explains with case examples a variety of social science research methods suitable for studying the unconscious components of irrational social and political actions in world affairs which can be defined as those

that are intensely destructive self destructive or extremely bizarre The book argues that they are driven in part by feelings and fantasies that are outside of conscious awareness Meyers explores the role of empathy in clinical understanding as well as the value of exposing assertions to empirical disconfirmation With a variety of research methods such as survey research content analysis and narrative analysis and case examples such as studies of irreal statements by authoritarian leaders fabricated newspaper articles and climate change denial this book sheds light on how to conduct research on psychodynamic matters in a scientifically valid and credible way

Primer in Critical Personalism James T. Lamiell, 2024-02-01 This insightful book offers contemporary psychologists and other social theorists an understanding of the comprehensive system of thought developed by the German scholar William Stern 1871 1938 known as critical personalism Expanding the author's ongoing efforts in this area the book considers firstly how critical personalism could ground a needed revival of psychological science a need created by the field's gradual transformation through its widespread adoption of aggregate statistical methods of investigation into a discipline better characterized as psycho demography Consistent with Stern's own view of the potential of critical personalism vis a vis socio ethical concerns the book then explores how the framework could facilitate a transcendence of thinking about racial and other social relationships beyond currently prevailing narratives about personkinds into narratives that are actually about persons This part of the book includes a chapter discussing Stern's own historical efforts in this direction serving to highlight the non individualistic nature of critically personalistic thinking Throughout Lamiell constructs a clear case for the merits and applicability of critical personalism in modern psychology and social thought *Primer in Critical Personalism* will interest established psychological scientists and advanced students in the field as well as those who are concerned about our contemporary socio cultural ethos and the prospects for its improvement including philosophers sociologists educators journalists clerics and thoughtful laypersons alike

Freud and Freudians on Religion Donald Capps, 2001-01-01 This book presents selections from Freud's writings on religion and from the work of five more recent contributors to the psychoanalytic study of religion David Bakan Erik H Erikson Heinz Kohut Julia Kristeva and D W Winnicott It is the first collection of texts in the psychology of religion that is oriented more toward religious studies than toward the study of psychology In his introduction Donald Capps points out that psychoanalysis resembles religions in the way in which its founding documents Freud's own writings have been closely read have evoked interpretive battles and have been reassessed and reapplied in response to changing social and cultural circumstances He notes that just as Freud's writings on religion focus on the biblical text the majority of the authors included here do likewise showing how the Bible may be read psychoanalytically Both Freud and his successors says Capps also reflect the high value that the Christian culture of the West has placed on painting and sculpture revealing the importance of perception and imagination to the psychoanalytic study of religion Capps highlights the ways in which all the Freudians work intertextually with Freud's writings with the writings of other authors included in the book and with other writings of their own

Post-Popperian

Methodology of Economics Neil de Marchi, 1992-10-31 For much of the last three decades or more economic methodology has been dominated by the work of Karl Popper who advocated the position that science is what it is by virtue of its adherence to certain ideals. The methodology of science is therefore not empirical or descriptive but rather a set of rules for producing rational or objective knowledge. This volume presents alternatives to an exclusively Popperian methodology; its purpose is not to reject Popper but to show there are other ways of construing methodology. The book is divided into three parts. Part I contains two critical surveys: one dealing with the rule-based tradition which has had a great influence on economic methodology in the last three decades and the other arguing for the social conditioning of knowledge. Part II is concerned with auxiliary hypotheses needed to link rational choice at the social and individual levels. Part III follows up on aspects raised in linking rational choice at the social and individual levels by looking at specific issues including rhetoric and economics and gender and economic research.

Interpersonal Dynamics: Essays and Readings on Human Interaction Warren G. Bennis, 1973 *The Dialogist*, 1969 **Personality Theories** Barbara Engler, 2003 This text is designed both to explain the major theories and to stimulate critical thinking about them. Each chapter focuses on one theory or group of theories providing brief biographies that shed light on how the theories were formed. *Sexuality in the Land of Oz* Wayne Wilson, 1994-09-06 This work explores how films tell stories about sexual experiences. Oz in this exploration does not refer to the movie's fantasy world but to the moviegoer's response to that world of glamourised sexual practices. It provides an extensive coverage of sexual dramatisations including movies concerned with conception, abortion, gender, love, marriage, adultery, sexual coercion, and AIDS.

Some Intraorganizational Influences on Supervisory Styles Among Professional Social Workers George Roger Thomas, 1969 **Mind and Context in the Art of Drawing** Kenneth R. Beittel, 1972 **Readings for Experimental Psychology** Charles L. Sheridan, 1972 **Political Research Methods** Barbara Leigh Smith, 1976 **What We Say/what We Do** Irwin Deutscher, 1973 This book has some of the qualities of a detective story and of a drama. As a drama it resembles a dialogue between the author and his friends and foes. The book has a beginning, middle, and end that do not correspond to the economical but quite a historical character of most scientific writing where the literature is reviewed and problems stated, the evidence presented, and a conclusion reached. Instead, the beginning is an account of the author's confrontation with a nagging, persistent, and perhaps ultimately insoluble problem that faces every honest researcher: can we explain behaviour by giving evidence of attitudes? The middle develops new leads and materials but never abandons the central characters of the first act. The end, in Pirandello fashion, leaves us with a feeling of illumination but illumination of the essential paradoxes and difficulties, not the light that breaks on a heroic solution.
