

The Different Types of Point of View

First Person Point of View

First person is used when the main character is telling the story. This is the kind that uses the "I" narrator. As a reader, you can only experience the story through this person's eyes so you won't know anything about the people or events that this person hasn't personally experience.

First Person Peripheral

This is when the narrator is a supporting character in the story, not the main character. It still uses the "I" narrator but since the narrator is not the protagonist that the narrator will not have access to.

Second Person Point of View

Second person point of view is generally only used in instructional writing. It is told from the perspective of "you".

Third Person Point of View

Third person point of view is used when the narrator is not a character in the story. Third person uses the "he/she/it" narrator and it is most commonly used in point of view writing.

THREE TYPES OF THIRD PERSON POINT OF VIEW:

- a. **Third Person Limited**
 - Limited means that the POV is limited to only one character. Which means that the narrator only knows what that character knows with third person limited you can choose to view the action from right inside the character's head, or from further away, where the narrator has more access to information outside the protagonist viewpoint.
- b. **Third Person Multiple**
 - This type is still in the "he/she/it" category, but now the narrator can follow multiple characters in the story. The challenge is making sure that the reader knows when you are switching from one character to another. Make the switch obvious with the chapter or section breaks.
- c. **Third Person Omniscient**
 - This point of view still uses the "he/she/it" narration but now the narrator knows EVERYTHING. The narrator isn't limited by what one character knows sort of like the narrator is god. The narrator can
