Budget Your Goals Not Your Silver H Doyle Smith, 2024-05-24 When the author purchased a property in the mountains he daydreamed about owning a large tract in the area On reflection he asked himself What will I do with it Without a use the land would have no value This insight showed him that the value of the land depended on the objective for which the land would be used not some other person's opinion of its value As a result when he studied economics in college he questioned the basic definition of an economic transaction Rather than finding that that transaction was an exchange of currency for goods and services he found that the basic transaction in economics was the use of a resource for accomplishing an objective This enabled him to look at economies where money was not used The title of this book Budget Your Goals Not Your Silver is the result Car salesmen are taught not to sell cars but what the cars will be useable for The real estate agent must sell what the house can be used for and not the house itself Cash economies must use data and data is not available unless there is a unit of measurement but the process of obtaining what is needed is not limited to cash economies This book discusses the process of economies As essential as economic studies are valid economic studies must use data But understanding the process goes beyond that study

A Theory of International Organization Liesbet Hooghe, Tobias Lenz, Gary Marks, 2019-08-29 Why do international organizations IOs look so different yet so similar The possibilities are diverse Some international organizations have just a few member states while others span the globe Some are targeted at a specific problem while others have policy portfolios as broad as national states Some are run almost entirely by their member states while others have independent courts secretariats and parliaments Variation among international organizations appears as wide as that among states This book explains the design and development of international organization in the postwar period It theorizes that the basic set up of an IO responds to two forces the functional impetus to tackle problems that spill beyond national borders and a desire for self rule that can dampen cooperation where transnational community is thin The book reveals both the causal power of functionalist pressures and the extent to which nationalism constrains the willingness of member states to engage in

incomplete contracting The implications of postfunctionalist theory for an IO s membership policy portfolio contractual specificity and authoritative competences are tested using annual data for 76 IOs for 1950 2010 Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford
