A Dictionary of Proto-Circassian Roots Aert H. Kuipers,1975 A Dictionary of Proto-Circassian Roots Aert Hendrik Kuipers,1975 Dictionary of Proto-Circassian roots Aert Hendrik Kuipers,1975 **The Synchronic and Diachronic Phonology of Ejectives** Paul D. Fallon,2013-12-16 This study is the first book length examination of ejectives and their phonological patterning deepening the empirical understanding of ejectives and contributing to both phonological theory and to typologies of sound change **Handbook of Comparative and Historical Indo-European Linguistics** Jared Klein,Brian Joseph,Matthias Fritz,2017-09-25 This book presents the most comprehensive coverage of the field of Indo European Linguistics in a century focusing on the entire Indo European family and treating each major branch and most minor languages The collaborative work of 120 scholars from 22 countries Handbook of Comparative and Historical Indo European Linguistics combines the exhaustive coverage of an encyclopedia with the in depth treatment of individual monographic studies **In Hot Pursuit of Language in Prehistory** John D. Bengtson,2008 Compiled in honor and celebration of veteran anthropologist Harold C Fleming this book contains 23 articles by anthropologists in the general sense from the four main disciplines of prehistory archaeology biogenetics paleoanthropology and genetic historical linguistics Because of Professor Fleming s major focus on language he founded the Association for the Study of Language in Prehistory and the journal Mother Tongue the content of the book is heavily tilted toward the study of human language its origins historical development and taxonomy Because of Fleming s extensive field experience in Africa some of the articles deal with African topics This volume is intended to exemplify the principle in the words of Fleming himself that each of the four disciplines is enriched when it combines with any one of the other four The authors are representative of the cutting edge of their respective fields and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them **Word Prominence in Languages with Complex Morphologies** Ksenia Bogomolets,Harry van der Hulst,2023-03-30 This volume focuses on the theoretical and analytical challenges that languages with complex morphologies pose for the theory and typology of word level prosodic phenomena The morphological complexity and phonological length that are characteristic of words in these languages make them a particularly fruitful ground for investigating the effects of both phonological and morphological factors in the assignment of prominence The first three chapters in the volume explore general theoretical issues pertaining to word prominence in synthetic languages including the issue of wordhood and the empirical theoretical and methodological issues with delineating word level prominence and the higher level prosodic phenomena in these languages These are followed by a series of case studies on stress accent and tone in a geographically and genetically diverse set of languages with highly synthetic morphologies including languages of the Americas Europe and Asia and Australia The volume adopts an interdisciplinary perspective combining phonetic phonological and morphosyntactic insights It will be of interest not only to phonologists and

morphologists but to all those interested in the typological and theoretical issues relating to polysynthetic languages
