Data Analysis For Social Workers:

Statistics and Data Analysis for Social Workers John L. Craft, Lawrence R. Asking, 1985 **Data Analysis: a Workbook for Social Workers** Tanya Coakley, 2017-12-30 The Practice of Research in Social Work Rafael J. Engel, Russell K. Schutt, 2005-02-15

The Practice of Research in Social Work introduces research methods as an integrated set of techniques for investigating the problems encountered in social work. This innovative text encourages students to connect technique and substance to understand research methods as an integrated whole and to appreciate the value of qualitative and quantitative alternatives. The text enables students to both critically evaluate research literature and to develop the skills to engage in research and practice evaluation. Each chapter shows how particular research methods have been used to investigate an interesting social work research question and content on research ethics and diversity is infused into each chapter. The goal of validity is introduced early in the text and used as an integrating theme throughout the book. Methods of particular concern in social work research are highlighted with chapters devoted to group survey, single subject, and qualitative designs. The text is lively and accessible yet the coverage is thorough and up to date.

Data Analysis for Social Workers Denise Montcalm, David Daniel Royse, 2002. This user-friendly text is designed specifically for social work students who are intimidated by the prospect of taking a Statistics course. With its engaging conversational writing style and numerous examples and problems, social work students will quickly learn to understand and interpret both quantitative and qualitative data. The text's flexibility makes it suitable for a variety of teaching styles. Instructors who want their students to get the actual feel of computing a chi square can use the Formula Alerts to calculate certain statistics manually; other instructors may want students to use the step-by-step computer applications to produce the same results.

Program Evaluation for Social Workers Richard M. Grinnell, Peter A. Gabor, Yvonne A. Unrau, 2018-12-27. Over the course of 20 years and eight editions, the goals of the book have remained the same: to prepare students to participate in evaluative activities within their organizations, become beginning critical producers and consumers of the professional evaluative literature, and reap the benefits of more advanced evaluation courses and texts. The authors aim to meet these objectives by presenting a unique approach that is realistic, practical, applied, and user-friendly. Unlike other textbooks on the market, *Program Evaluation for Social Workers* presents both program-level evaluation and case-level evaluation methods, assuming that neither of these two distinct approaches alone adequately reflects the realities of the field. The book demonstrates how they can instead complement each other. This integration of approaches provides an accessible, adaptable, and realistic framework for students and beginning practitioners to more easily grasp and implement in the real world.
