Lewis** David K. Lewis, 2020-10-29 David Kellogg Lewis 1941 2001 was one of the most influential philosophers of the twentieth century He made significant contributions to almost every area of analytic philosophy including metaphysics philosophy of language philosophy of mind and philosophy of science and set the agenda for various debates in these areas which carry on to this day In several respects he remains a contemporary figure yet enough time has now passed for historians of philosophy to begin to study his place in twentieth century thought His philosophy was constructed and refined not just through his published writing but also crucially through his life long correspondence with fellow philosophers including leading figures such as D M Armstrong Saul Kripke W V Quine J J C Smart and Peter van Inwagen His letters formed the undercurrent of his published work and became the medium through which he proposed many of his well known theories and discussed a range of philosophical topics in depth A selection of his vast correspondence over a 40 year period is presented here across two volumes As metaphysics is arguably where Lewis made his greatest contribution this forms the focus of Volume 1 Arranged under the broad areas of Causation Modality and Ontology the letters offer an organic story of the origins development breadth and depth of his metaphysics in its historical context as well as a glimpse into the influence of his many interlocutors This volume will be an indispensable resource for contemporary metaphysics and for those interested in the Lewisian perspective *The Life and Adventures of David Lewis, the Celebrated Robber and Counterfeiter* David Lewis, 1853 Reality and Humean Supervenience Gerhard Preyer, Frank Siebelt, 2002-07-15 If asked what Humeanism could mean today there is no other philosopher to turn to whose work covers such a wide range of topics from a unified Humean perspective as that of David Lewis The core of Lewis's many contributions to philosophy including his work in philosophical ontology intensional logic and semantics probability and decision theory topics within philosophy of science as well as a distinguished philosophy of mind can be understood as the development of philosophical position that is centered around his conception of Humean supervenience If we accept the thesis that it is physical science and not philosophical reasoning that will eventually arrive at the basic constituents of all matter pertaining to our world then Humean supervenience is the assumption that all truths about our world will supervene on the class of physical truths in the following sense There are no truths in any compartment of our world that cannot be accounted for in

terms of differences and similarities among those properties and external space time relations that are fundamental to our world according to physical science
