Free Essay Example: Analysis of Dax's Case Essay

Dax's case is often mentioned in the debate on the doctrine of informed consent. Donald 'Dax' Cowart was an Air Force pilot and amateur pilot who became a stalwart of personal autonomy after unsuccessfully declining treatment for burns in the early 1970s. He was just 25 years old when, together with his father, he was caught up in a pipeline explosion in Texas back in 1973. Cowart survived, although his father succumbed to injuries within hours. He was facially disfigured, blinded, lost the ability to use both hands, and suffered over 65% body burns (Parsi & Winslade, 2019). Right after the incident, Cowart insisted on being allowed to die, although doctors declined to grant his wishes. This essay presents a detailed analysis of Dax's case.

When the incident happened, the policy of informed consent was already quite well-developed. However, the doctrine of informed refusal was another different matter. Cowart was competent and in the capacity to make informed decisions, despite what his doctors may have thought. Today, this is perceived as a standard in bioethics- a patient in a position to make lucid decisions has an ethical and legal right to decline any treatment, even if it can save his or her life. Yet, in the early 1970s, it seemed like a radical thing to do.

Even if a hospice has an ethics committee, it is advisable to regularly review policies touching on ethical decision-making, and implement necessary improvements. A notable way of doing this involves training staff to apply the four-box method of figuring out ethical decisions. Also known as Jonsen's model, it can be applied to any situation where healthcare staff is faced with ethical issues (Pugh, 2017). The method is practical as it enables staff to rank the salient issue and prioritize what is most important. It is a tool that ensures a healthcare professional has all the information needed to make an ethical decision.

The first step in using the four-box method involves gathering information and then dividing it according to four boxes. The first box is meant for medical indications and is all about the patient's prognosis, the disease to process, and any medical issues that the patient may be experiencing. The second box contains the patient's preferences and highlights his or her wants, desires and goals. It also indicates if the patient can speak for themselves, or whether his or her interests have to be represented by a family member.

The third box is all about the quality of life. It contains information on the patient's ability to enjoy themselves. It also shows the quality of life currently being experienced by the patient and how he or she would like to live. The fourth box holds contextual characteristics and can be thought of as the storage bag that contains the patient's entire information. This includes religious and cultural aspects, family features, living arrangements, and so on. By organizing the patient's information into the four boxes, the ethics committee gets a more accurate picture of what is going on. The next step is all about applying ethical principles to come to an ethical decision and conclusion.

In Dax's case, the principles associated with the second box were violated. According to Jonsen's model, it should be about the patient's preferences, whether or not he or she is mentally capable of making sound decisions, and whether or not he or she understands the benefits and risks of what they were asking for. Despite being in excruciating pain, Dax was in a good mental condition and

Virtual Decisions Steve Cohen, Kent E. Portney, Dean Rehberger, Carolyn Thorsen, 2006-08-15

Developments in digital technologies and in understandings of how best to use them have altered teaching and learning environments and stand to do so even more rapidly in the future

Virtual Decisions Digital Simulations for Teaching Reasoning in the Social Sciences and Humanities focuses on the special issues related to the use of digital technologies in teaching the complex nature of social decisions with particular attention to the use of digital role play simulations as a means to accomplish this

With the advent of new technologies for delivering multimedia simulations to students and advanced graphics capabilities to create life like decision environments digital role play simulations are increasingly available for K 12 and higher education teachers to use in the classroom

This book helps both users and developers make intelligent choices about the value added by using simulations technology and media to teach reasoning in social sciences and humanities classrooms

The book relies on a four part framework for developing a digital multimedia based simulation approach which represents a cross disciplinary method to describing simulations the students who are using them the educational setting in which they are used and a rubric for assessing learning

The volume is divided into two parts

The first part presents a review of the theory and research detailing why didactic approaches do not or cannot address specific learning goals as well as a description of the theoretical framework for using and developing simulations

The second part includes chapters on specific digital simulations and how they fit with the theoretical framework

Virtual Decisions fills a significant gap in the existing literature of instructional technology and is of interest to instructors primarily in the social sciences and humanities who are potential users of the simulations

It is also a resource for graduate students and pre service teachers studying simulation design

Narrating Patienthood Peter M. Kellett, 2018-11-26

Diversity plays an important role in how people experience illness and healthcare as patients

Listening carefully to stories of how race class age gender sexuality and disability can affect patient experience can be revealing and provide much needed change to health communication in the patienthood narrative

This book is a collection of vibrant and engaging essays by scholars of narrative methods in health communication

Each chapter takes readers into the fascinating world of patients who use stories from their personal lives to challenge us to rethink reimagine and reformulate what health communication means in practice

Each section of the book focuses on an important aspect of the theory and practice of the patienthood narrative

Part one explores the important ways that telling and sharing patient s stories can lead to learning empowerment and advocacy

Part two explores several key forms of diversity and how they affect patienthood

Part three illustrates how personal relational and cultural aspects of identity

intersect to shape the patient experience **In Case of Fire, Stop, Drop, and Hold** Jean Napua Sakimura,1998
