*Restoring Lands - Coordinating Science, Politics and Action* Herman Karl, Lynn Scarlett, Juan Carlos Vargas-Moreno, Michael Flaxman, 2012-02-05 Environmental issues vast and varied in their details unfold at the confluence of people and place They present complexities

in their biophysical details their scope and scale and the dynamic character of human action and natural systems Addressing environmental issues often invokes tensions among battling interests and competing priorities Air and water pollution the effects of climate change ecosystem transformations these and other environmental issues involve scientific social economic and institutional challenges This book analyzes why tackling many of these problems is so difficult and why sustainability involves more than adoption of greener cleaner technologies Sustainability as discussed in this book involves knowledge flows and collaborative decision processes that integrate scientific and technological methods and tools political and governance structures and regimes and social and community values The authors synthesize a holistic and adaptive approach to rethinking the framework for restoring healthy ecosystems that are the foundation for thriving communities and dynamic economies This approach is that of collective action Through their research and practical experiences the authors have learned that much wisdom resides among diverse people in diverse communities New collaborative decision making institutions must reflect that diversity and tap into its wisdom while also strengthening linkages among scientists and decision makers From the pre publication reviews Finally we have a book that explains how science is irrelevant without people It s people who decide when and how to use science not scientists This book gives us a roadmap for how to really solve complex problems It involves hard work and creating new relationships between scientists and the public that don t typically exist in our society John M Hagan Ph D President Manomet Center for Conservation Sciences [Channel Islands National Marine Sanctuary, Management Plan](#) ,2008 [Cordell Bank National Marine Sanctuary, Management Plan](#) ,2008

*Conservation, Science and Society* ,1984 [Effective Conservation Science](#) Peter Kareiva,Michelle Marvier,Brian Silliman,2017-10-06 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book s principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters discuss how to guard against confirmation bias The overall goal is that this book will lead to greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results
