Judicial Law-Making in European Constitutional Courts Monika Florczak-Wątor, 2020-05-07 This book analyses the specificity of the law making activity of European constitutional courts

The main hypothesis is that currently constitutional courts are positive legislators whose position in the system of State organs needs to be redefined. The book covers the analysis of the law making activity of four constitutional courts in Western countries: Germany, Italy, Spain, and France, and six constitutional courts in Central East European countries: Poland, Hungary, the Czech Republic, Slovak Republic, Latvia, and Bulgaria, as well as two international courts: the European Court of Human Rights (ECtHR) and the Court of Justice of the European Union (CJEU). The work thus identifies the mutual interactions between national constitutional courts and international tribunals in terms of their law making activity. The chosen countries include constitutional courts which have been recently captured by populist governments and subordinated to political powers. Therefore, one of the purposes of the book is to identify the change in the law making activity of those courts and to compare it with the activity of constitutional courts from countries in which democracy is not viewed as being under threat. Written by national experts, each chapter addresses a series of set questions allowing accessible and meaningful comparison. The book will be a valuable resource for students, academics, and policy makers working in the areas of constitutional law and politics.

The Oxford Handbook of Comparative Administrative Law Peter Cane, Herwig Hofmann, Eric C. Ip, Eric Chi Yeung Ip, Peter L. Lindseth, 2021. In this Handbook, distinguished experts in the field of administrative law discuss a wide range of issues from a comparative perspective. The book covers the historical beginnings of comparative administrative law scholarship and discusses important methodological issues and basic concepts such as administrative power and accountability. Definition and Development of Human Rights and Popular Sovereignty in Europe European Commission for Democracy through Law, Council of Europe, 2011. What role do the people play in defining and developing human rights? This volume explores the very topical issue of the lack of democratic legitimisation of national and international courts and the question of whether rendering the original process of defining human rights more democratic at the national and international level would improve the degree of protection they afford. The authors venture to raise the crucial question: When can a democratic society be considered to be mature enough so as to be trusted to provide its own definition of human rights obligations?

American Constitutional Law William A. Kaplin, 2004. The preface and introduction to the Teacher's Manual are available by clicking [here](#). The 2012 Update is available by clicking [here](#). Conveniently divided into fifteen chapters with numerous subsections, this book presents a clear, comprehensive, and integrated introduction to the U.S. Constitution and American constitutional law. Kaplin develops the basic concepts, conceptual distinctions, and first principles that provide the foundation for constitutional law: the process by which the Constitution is interpreted and the analytical methodologies by which individual clauses are applied to new circumstances. Leading U.S. Supreme Court cases, especially the classical cases, are also presented and analyzed throughout. The author periodically uses history, political science, and jurisprudence to enhance the reader's understanding of the subject, including a section on constitutionalism from the early Greek philosophers to the present, historical timelines of Supreme Court case developments, and expositions of the American concepts of

federalism and separation of powers Several sections also discuss the inter relationship between the federal Constitution and state constitutions This book contains substantial study guidance for students in law school courses or law related graduate school courses and readers who are engaged in independent learning apart from any formal course There are learning exercises at many points in the book for instance followed by answer guidelines There is also a section on study suggestions at the end of each substantive chapter a methodology for reading and analyzing cases guidance on study techniques and exam taking and bibliographies to guide further reading The teacher s manual includes numerous realistic problems with review guidelines that the instructor may distribute to students as well as various analytical frameworks that the instructor can use to guide student analysis of particular types of problems and various graphics that illustrate key concepts The manual is also set up so that it provides instructors guidance and materials that would allow them to use the text with materials they generate on their own rather than adopting a casebook
