Constructing Democracy:

Engaging the Community in Decision Making Roz Diane Lasker, John A. Guidry, 2009-03-23 In recent years the rapidly growing field of community participation has promised to give people formerly excluded from decision making an influential voice about issues that affect their lives Inclusive processes implemented in the United States and internationally have certainly given community members new opportunities to participate and be involved but how effective are these processes in promoting the voice and influence of the people who have historically been excluded the most the poorest least educated and most marginalized residents in communities Of the various participants who have a seat at the table whose voices are influential whose aren't and why This book summarizes how five community partnerships working with a team of researchers attempted to answer these critical questions Investigating 10 cases two from each community partnership the study tracks the ideas of everyone involved and reveals how and why the ideas of marginalized and ordinary residents were far less likely to be influential than those of people with more clout resources or acknowledged expertise Finally the authors explain how and why these influence inequities can be overcome providing readers with practical evidence based tools to help them do so The book should be helpful to readers involved in any form of active community participation from participatory research to civic engagement deliberative democracy and community initiatives Instructors considering this book for use in a course may request an examination copy here

Constructing Democracy in Southern Europe Lauren M. McLaren, 2008-04-08 Why are some regimes democratic while others are not Specifically how have Spain and Italy managed to become democratic while Turkey which shares many similar characteristics has not Spain Italy and Turkey have shared common historical features which would have been disruptive to any new democracy however they represent a wide array of democratization experiences Providing a comparative case study analysis this book offers some clues as to the reasons for successful transitions to democracy This is done through a range of variables which include the degree of stateness problems

learning from previous experiences with democracy and authoritarianism economic development the procedures used for designing the new rules of the regime the existence or absence of civil society and the connection between society and political institutions the democratic rules themselves the professionalization of the military the influence of external factors on democratic consolidation By examining these variables across the three countries Lauren McLaren narrows the range of possible explanations for differences in democratic consolidation The book will be of particular interest to students and researchers of European Politics and Democratization Studies **Making Democracy Fun** Josh A. Drawing on the tools of game design to fix democracy Anyone who has ever been to a public hearing or community meeting would agree that participatory democracy can be boring Hours of repetitive presentations alternately alarmist or complacent for or against accompanied by constant heckling often with no clear outcome or decision Is this the best democracy can offer In *Making Democracy Fun* Josh Lerner offers a novel solution for the sad state of our deliberative democracy the power of good game design What if public meetings featured competition and collaboration such as team challenges clear rules presented and modeled in multiple ways measurable progress such as scores and levels and engaging sounds and visuals These game mechanics would make meetings more effective and more enjoyable even fun Lerner reports that institutions as diverse as the United Nations the U S Army and grassroots community groups are already using games and game like processes to encourage participation Drawing on more than a decade of practical experience and extensive research he explains how games have been integrated into a variety of public programs in North and South America He offers rich stories of game techniques in action in children s councils social service programs and participatory budgeting and planning With these real world examples in mind Lerner describes five kinds of games and twenty six game mechanics that are especially relevant for democracy He finds that when governments and organizations use games and design their programs to be more like games public participation becomes more attractive effective and transparent Game design can make democracy fun and make it work Constructing Democratic Governance Jorge I.
