

# CONSTRUCTIVISM (LEARNING THEORY)

## DEFINITION

The constructivist learning theory explains that we learn by 'constructing' knowledge in our minds through interaction with our environments. Constructivism argues that learners have an active role in thinking things through, mulling them over, and coming to logical conclusions. We also build on our prior knowledge, like a builder constructing his skyscraper.

## KEY CONCEPTS

- Learning is a cognitive process
- We learn through experiences
- We learn through social interactions
- We use prior knowledge to make sense of new information
- Learning occurs in linear stages
- Students should learn actively rather than passively
