Cosmology and Biology in Ancient Philosophy Ricardo Salles, 2021-06-10 In antiquity living beings are inextricably linked to the cosmos as a whole Ancient biology and cosmology depend upon one another and therefore a complete understanding of one requires a full account of the other This volume addresses many philosophical issues that arise from this double relation Does the cosmos have a soul of its own Why Is either of these two disciplines more basic than the other or are they at the same explanatory level What is the relationship between living things and the cosmos as a whole If the cosmos is an animate intelligent being what is the nature of its thoughts and actions How do these relate to our own thoughts and actions Do they pose a threat to our autonomy as subjects and agents And what is the place of zoogony in cosmogony A distinguished international team of contributors provides original essays discussing these questions
