Big Squeeze:

What Caused the Big Bang? Rem Blanchard Edwards, 2001 This book critically explores answers to the big question What produced our universe around fifteen billion years ago in a Big Bang It critiques contemporary atheistic cosmologies including Steady State Oscillationism Big Fizz Big Divide and Big Accident that affirm the eternity and self sufficiency of the universe without God This study defends and revises Process Theology and arguments for God s existence from the universe s life supporting order and contingent existence

Take Back the Center Peter S. Wenz, 2012-08-24 Reality based arguments against right wing fantasies the case for reducing income inequality rebuilding our infrastructure investing in education and putting people back to work Midcentury America was governed from the center a bipartisan consensus of politicians and public opinion that supported government spending on education the construction of a vast network of interstate highways healthcare for senior citizens and environmental protection These projects were paid for by a steeply progressive tax code with a top tax rate at one point during the Republican Eisenhower administration of 91 percent Today a similar agenda of government action and progressive taxation would be portrayed as dangerously left wing At the same time radically anti government and anti tax opinions with no evidence to support them are considered part of the mainstream In **Take Back the Center** Peter Wenz makes the case for a sane reality based politics that reclaims the center for progressive policies The key he argues is taxing the wealthy at higher rates The tax rate for the wealthiest Americans has declined from the mid twentieth century high of 91 percent to a twenty first century low of 36 percent even as social programs are gutted and the gap between rich and poor widens dramatically Ever since Ronald Reagan famously declared that government was the problem and not the solution conservatives have had an all purpose answer to any question smaller government and lower taxes Wenz offers an impassioned counterargument He explains the justice of raising the top tax rates significantly making a case for less income inequality and countering society s worship of the wealthy and he offers suggestions for how to spend the increased tax revenues K 12 education tuition relief transportation and energy infrastructure and universal health care Armed with Wenz s evidence driven arguments progressives can position themselves where they belong in the mainstream of American politics and at the center of American political conversations helping their country address a precipitous decline in equality and quality of life

Organizing the Curriculum, 2019-02-11 Contemporary

American youth live in a culture that ignores or denigrates labor unions. Mainstream media cover labor issues only sparingly and unions no longer play much of a role in popular culture texts, films, or images. In our schools, labor has been limited to a footnote in textbooks instead of being treated seriously as the most effective force for championing the rights of working people, the vast majority of the citizenry. Teachers have been convinced that to bring up class or to teach about the labor movement may be construed as taking sides, while the all-pervasive presence of corporate America in our schools is rarely questioned. So for all the talk of schools preparing young people for the work world, we are failing to teach them even the basics of how that world is structured or how they can be empowered through collective action.

Organizing the Curriculum: Perspectives on Teaching the US Labor Movement is the first book-length treatment of this blind spot in contemporary curriculum and pedagogy. Contributors to this collection—unionists, activists, teachers, teacher educators, and academics—interrogate the ways in which knowledge is constructed in school discourses, conceptualize pedagogical strategies and curricula that open discussions around class analysis and political economy via studies of the labor movement, and put forward an activist vision of education that truly engages young people beyond the classroom walls.

A Final Story Nasser Zakariya, 2017-11-14

Popular science readers embrace epics, the sweeping stories that claim to tell the history of all the universe, from the cosmological to the biological to the social. And the appeal is understandable: in writing these works, authors such as E. O. Wilson or Steven Weinberg deliberately seek to move beyond particular disciplines to create a compelling story weaving together natural historical events, scientific endeavor, human discovery, and contemporary existential concerns. In *A Final Story*, Nasser Zakariya delves into the origins and ambitions of these scientific epics, from the nineteenth century to the present, to see what they reveal about the relationship between storytelling, integrated scientific knowledge, and historical method. While seeking to transcend the perspectives of their own eras, the authors of the epics and the debates surrounding them are embedded in political and social struggles of their own times, struggles to which the epics, in turn, respond. In attempts to narrate an approach to a final, true account, these synthesizing efforts shape and orient scientific developments, old and new. By looking closely at the composition of science epics and the related genres developed along with them, we are able to view the historical narrative of science as a form of knowledge itself, one that discloses much about the development of our understanding of and relationship to science over time.

Start Where You Are Pema Chödrön, 2004-03-09

This is a beautiful gift book edition with a ribbon marker of a modern-day classic. *Start Where You Are* is an indispensable handbook for cultivating fearlessness and awakening a compassionate heart. With insight and humor, Pema Chödrön, author of *The Wisdom of No Escape* and *When Things Fall Apart*, presents down-to-earth guidance on how to make friends with ourselves and develop genuine compassion toward others. The author shows how we can start where we are by embracing rather than denying the painful aspects of our lives. Pema Chödrön frames her teachings on compassion around fifty-nine traditional Tibetan Buddhist maxims or slogans, such as "Always apply a joyful state of mind. Don't seek others' pain."

as the limbs of your own happiness Always meditate on whatever provokes resentment Working with these slogans and through the practice of meditation Start Where You Are shows how we can all develop the courage to work with our own inner pain and discover joy well being and confidence
