Florence Andrea Ponsi,2011 Many years have passed since architect Andrea Ponsi settled in Florence and still he feels he does not fully comprehend this mysterious city The way Florence eludes understanding however can be an opportunity to keep seeking to keep exploring Ponsi s Florence is endlessly suggestive His tour of the city is one of continually shifting light and perspective of stunning symmetry and an even more compelling asymmetry of sudden transitions from bustling streets to the most perfect silence While Ponsi does consider such celebrated sites as the Piazza Santa Croce the Ponte Vecchio and the Duomo the book is a decidedly personal view of Florence The author notes the city s recurring geometry the square courtyards triangular spires octagonal plaques and pillars and marvels at a room almost too big to be called a room He views the city from various terraces and likens the expanse of rising and falling rooftops to ocean waves Here is Florence as labyrinth possessing a medieval density that is relieved only by the sudden views of sky framed by its piazzas Ponsi shows us a six street intersection and ponders the abundance of acute angles both indoors and out in this city of infinite corners In Florence humans and buildings commingle The author equates haircuts and changes of clothes with fresh coats of paint and re shingling jobs and contemplates the way a human hand feeling its way down a city block adds to the patina of a stucco wall Ponsi sees the city itself as a living body through whose veins its inhabitants course This is the way we dream an architect could speak to us fully communicating his passion The book s elegant concise prose as well as its balance of the civic with the intensely personal recalls the Calvino of *Marcovaldo* and *Invisible Cities* The text is accompanied by Ponsi s own spare but evocative watercolors and sketches which like his words seek to behold rather than pin down This lyrical tribute is as much an ode to the lost art of contemplation as it is to Florence a city where every moment is different from every other moment **Mapping Space, Sense, and Movement in Florence** Nicholas Terpstra,Colin Rose,2016-02-05 Mapping Space Sense and Movement in Florence explores the potential of digital mapping or Historical GIS as a research and teaching tool to enable researchers and students to uncover the spatial kinetic and sensory dimensions of the early

modern city The exploration focuses on new digital research and mapping projects that engage the rich social cultural and artistic life of Florence in particular One is a new GIS tool known as DECIMA Digitally Encoded Census Information and Mapping Archive and the other is a smartphone app called Hidden Florence The international collaborators who have helped build these and other projects address three questions how such projects can be created when there are typically fewer sources than for modern cities how they facilitate more collaborative models for historical research into social relations senses and emotions and how they help us interrogate older historical interpretations and create new models of analysis and communication Four authors examine technical issues around the software programs and manuscripts Five then describe how GIS can be used to advance and develop existing research projects Finally four authors look to the future and consider how digital mapping transforms the communication of research results and makes it possible to envision new directions in research This exciting new volume is illustrated throughout with maps screenshots and diagrams to show the projects at work It will be essential reading for students and scholars of early modern Italy the Renaissance and digital humanities
