Trends in Youth Development Peter L. Benson, Karen Johnson Pittman, 2012-12-06 MOVING THE YOUTH DEVELOPMENT MESSAGE TURNING A VAGUE IDEA INTO A MORAL IMPERATIVE Peter L Benson and Karen Pittman THE CONTAGION OF AN IDEA In the past fifteen years countless programs agencies funding initiatives profes sionals and volunteers have embraced the term youth development Linked more by shared passion than by formal membership or credentials these people and places have contributed to a wave of energy and activity not unlike that of a social movement with a multitude of people on the ground connecting to a set of ideas that give sustenance support and value to increasingly innovative efforts to build competent successful and healthy youth There are several particularly interesting dimensions to this movement First the youth development idea has the potential to draw people and organizations to gether across many sectors Conferences and initiatives using youth development language attract increasingly eclectic audiences bringing together national youth organizations schools city county and state agencies police and juvenile jus tice workers clergy and committed citizens Perhaps embedded in the youth de velopment idea is a philosophy or a way that has created an intellectual and or spiritual home for actors across many settings However this happens it is clear that one of the powerful social consequences of the youth development idea is a connecting of the dots the weaving within and across city county state and of a tapestry of new relationships

Generational Development Roy Huijsmans, 2016-12-24 This ground breaking book weaves together insights from the children and youth studies literature and critical development studies Debunking the idea of childhood and youth as self evident social categories the author unravels how these generational constructs are re constituted and experienced in relational terms in development contexts spanning both the Global South and the Global North Running through these chapters is a fundamental concern with age gender and generation as key principles of social differentiation This is developed in Part 1 at a theoretical level and applied to everyday contexts including school work migration and the street in Part 2 Part 3 zooms in on the generational dynamics of development by exploring how prominent development interventions conditional cash transfers schooling problems gender discrimination and questions the generational question of farming shape the gendered experience of being young and growing up

Youth Development and Physical Activity Donald R. Hellison, 2000 Professionals in educational and recreational settings work hard to understand and address the problems faced by underserved youth Yet the dedicated people in these institutions are often limited in what they can achieve because they tend to remain within the confines of their own work environment rather than sharing their expertise and resources Instead of accepting this as an unfortunate fact of life the coauthors of this book see the situation as an opportunity to develop an approach in which the whole is far greater than the sum of its parts In Youth Development and Physical Activity Linking Universities and Communities they draw on their considerable teaching experience to present innovative new ways to serve underserved youth The book describes practical strategies for breaking down the walls between universities and communities so they can combine their

strengths to improve young people's lives. You'll find a wealth of guidelines for creating physical activity programs that instill a sense of social and personal responsibility including numerous real life examples of successful programs. **Youth Development and Physical Activity Linking Universities and Communities** is divided into four parts each enriched with the colorful voices and stories of real kids and youth leaders who have put these ideas into practice. Part I provides a sobering look at the challenges today's young people face and introduces positive ways to improve physical activity youth programs so they're meaningful in today's world. In Part II you'll learn how to move from how it is to how it could be using a breakthrough model for working with kids and building programs. Here the book provides a road map that shows the way for university students and faculty to connect with youth in their communities through service learning internships and other outreach programs. Part III spells out how to develop a variety of proven youth physical activity programs from adventure experiences and Coaching Clubs to mentoring and teen parent programs. You'll find many great ideas that work in virtually any setting including public schools, alternative schools, recreation programs, youth service groups, and social agencies. Part IV provides a variety of helpful tools for evaluating programs and improving outcomes as well as insights on how professionals can develop the skills they need to respond to the changing demands on youth leaders. Written by professionals with a combined 70 years of experience working with underserved youth, this book is must reading for both professionals and organizations practicing in a world where youth too often slip through the cracks. It provides a clear and hopeful framework for improving the lives of kids as well as the communities in which they live.

Mobilizing Adults for Positive Youth Development E. Gil

Clary, Jean E. Rhodes, 2006-09-24 Perhaps no other challenge is more pressing in creating developmentally tentative community and society the theme of this book series than mobilizing adults to play a

constructive role in the lives of children and adolescents. In a society that too easily defaults to designing programs as cure-alls for meeting young people's needs, particular attention must be paid to understanding and mobilizing the kind of positive relational energy that prepares each successive generation to assume its place in society. Although programs and institutions certainly play important roles, the key lies in the personal commitment, involvement, and investment of adults in young people's lives. In **Mobilizing Adults for Positive Youth Development: Strategies for Closing the Gap between Beliefs and Behaviors**, E. Gil Clary and Jean E. Rhodes have assembled the insights of leading scholars from multiple disciplines and contexts for engaging a broad cadre of adults as allies for youth development. As the editors write, the question guiding the book is:

How can we most effectively encourage adults both individually and collectively to begin to behave differently with respect to the young people of a community to do so consistently and to do so in a variety of ways? What is being proposed then is nothing less than a social movement that engages individuals, small groups, neighborhoods, workplaces, schools, faith communities, and broader social institutions in attending to the well-being and healthy development of young people.
