Children's Rights Contemporary Perspectives:

Children's Rights Patricia A. Vardin, Ilene N. Brody, 1979 **Children's rights**, 1979 **Children's Rights: Progress and Perspectives** Michael D. A. Freeman, Michael Freeman, 2011-10-28 The International Journal of Children's Rights has been a major player in all this Its impact is worldwide It has established itself as the leading journal in the field The journal is now in its 19th year and is flourishing This volume has been compiled not only to commemorate the journal's work but also the 20th anniversary of the Convention coming into operation and of the first World Summit on Children An anthology of the best articles published in these formative years this volume offers a representative sample of what the journal has achieved Some of the articles are ones which are frequently cited whilst others are less well known some deal with theory others with practice The case for children's rights is to be found throughout this collection as is the history of children's rights *Children's Rights in the United States* Nancy E. Walker, Catherine M. Brooks, Lawrence S. Wrightsman, 1999 The Rights of Children in the United States provides discussion on the historical and contextual perspective on the rights of children the UN Convention on the Rights of the Child and the differing views on children's rights and competencies **Monitoring Children's Rights** Eugeen Verhellen, 2023-08-28 Intense political social and scientific efforts to improve the position of children are converging rapidly centered on the UN Convention on the Rights of the Child It is therefore reasonable to assume that there is broad consensus in the international community on how to take the position of children in society seriously Despite the unique success of the Convention the situation is such that it forces us as a matter of urgency to explore develop and implement guarantees for effective monitoring of the implementation of the Convention's provisions In the end rights are only effective when implemented This book containing the contributions made and discussed at the European Conference on Monitoring Children's Rights organized by Ghent University's Children's Rights Centre in December 1994 presents the results of interdisciplinary research into monitoring to a wider scientific forum Several monitoring issues are tackled with particular emphasis on the reporting system what should be reported the content of the reports and who should report the more formal and procedural aspects of reporting Apart from a suitable monitoring mechanism there is also the self-executing force of the Convention making it directly enforceable in national courts Ongoing and dynamic monitoring can be a powerful impetus to making systematic progress in this area The debate on monitoring the Children's Rights Convention may in this way expand into an attractive and exemplary debate on human rights conventions in general This book will therefore not only meet the requirements of all those working in the field of children's rights but can also provide appealing material for all those involved in the field of monitoring human rights Children, Families, and Health Care Decision Making Lainie Friedman Ross, 2002 ISSUES IN BIOMEDICAL ETHICS General Editors John Harris University of Manchester Soren Holm University of Manchester Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany The late

twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes All too often ethical analysis has lagged behind these changes The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just health care trainees and professionals but also social scientists philosophers lawyers social workers and legislators The series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest Philosophers doctors and lawyers from several countries already feature among the contributors to the series It promises to become the leading channel for the best original work in this burgeoning field this book Lainie Friedman Ross presents an original and controversial examination of the moral principles that guide parents in making health care decisions for their children and the role of children in the decision making process She opposes the current movement to increase child autonomy in favour of respect for family autonomy She argues that children should be included in the decision making process but that parents should be responsible for their children s health care even after the children have achieved some threshold level of competency The first half of the book presents and defends a model of decision making for children s health care the second half shows how it works in various practical contexts considering children as research subjects and as patients organ donorship and issues relating to adolescent sexuality Implementation of Ross s model would result in significant changes in what informed consent allows and requires for paediatric health care decisions This is the first systematic medical ethics book that focuses specifically on children s health care It has important things to say to health care providers who work with children as well as to ethicists and public policy analysts

Childhood Disability and Family Systems Michael Ferrari, Marvin B. Sussman, 2016-01-08 First published in 1987 this book focuses on childhood disability within the family It examines the very nature of disability itself as well as many of the fundamental elements of families The book was written at a time when the meaning level of disability and its effect on family and society were rapidly changing and people with disabilities were starting to benefit from opportunities to compensate for whatever disabilities they may have had Modern technology and an affluent society afforded advantages to support many of its disabled members Contributors examine the contemporary context of disability the cost of disability to families ethical philosophical and social issues underlying the treatment and rehabilitation of children with severe disabilities and the role of professionals amongst other topics This book will be of interest to those involved in teaching research and direct care with families who have children with disabilities Although written in the late 80s the work discusses subjects that are still vital today
