Children's Written Language Difficulties:

Children's Comprehension Problems in Oral and Written Language Kate Cain, Jane Oakhill, 2008-05-07

Comprehension is the ultimate aim of reading and listening. How do children develop the ability to comprehend written and spoken language and what can be done to help those who are having difficulties? This book presents cutting edge research on comprehension problems experienced by children without any formal diagnosis as well as those with specific language impairment, autism, ADHD, learning disabilities, hearing impairment, head injuries, and spina bifida. Providing in depth information to guide research and practice, chapters describe innovative assessment strategies and identify important implications for intervention and classroom instruction. The book also sheds light on typical development and the key cognitive skills and processes that underlie successful comprehension.

Persisting Speech Difficulties in Children Michelle Pascoe, Joy Stackhouse, Bill Wells, 2006-05-12. This is the third book in the series *Children's Speech and Literacy Difficulties* and is based on research and practice with school age children with persisting speech and associated difficulties. It focuses on the psycholinguistic nature of their difficulties, how to design intervention programmes, and how intervention outcomes might be measured. It will serve as a practical handbook and will contain useful word lists, tips, and photocopiable sheets in the appendix. Each chapter will summarise recent research findings and close with a bulleted summary of the main points in the chapter. Provides an explanation of the psycholinguistic approach and how to implement it and integrate it with other approaches. Includes case studies.
