## **Childs Construction Of Knowledge:**

The Child's Construction of Knowledge George E. Forman, David S. Kushner, 1977 Knowledge under Construction Daniel Ness, Stephen J. Farenga, 2007-03-26 Knowledge under Construction investigates how young children develop spatial geometric and scientific thinking skills particularly those associated with architecture Based on original research and analysis of videotapes of children s play with blocks the authors findings suggest that such play is anything but pointless Their conclusions fill in gaps in our current understanding of how children learn to think spatially and scientifically even while challenging portions of that understanding including some of Piaget s thesis about the primacy of topological space in children s learning A system of measurement developed to identify and categorize children s spontaneous behavior at play allows adults to observe patterns of behavior as children play and record the development of process skills and cognitive abilities enhancing our understanding of how children begin to learn about space and architectural relationships The book also examines the educational implications of our enhanced understanding One possible development is a new alternative way to measure cognitive abilities and development in children based on their work with blocks **Innocence, Knowledge and the Construction of Childhood** Kerry H. Robinson, 2013-05-02 Innocence Knowledge and the Construction of Childhood provides a critical examination of the way we regulate children s access to certain knowledge and explores how this regulation contributes to the construction of childhood to children s vulnerability and to the constitution of the good future citizen in developed countries Through this controversial analysis Kerry H Robinson critically engages with the relationships between childhood sexuality innocence moral panic censorship and notions of citizenship This book highlights how the strict regulation of children s knowledge often in the name of protection or in the child s best interest can ironically increase children s prejudice around difference increase their vulnerability to exploitation and abuse and undermine their abilities to become competent adolescents and adults Within her work Robinson draws upon empirical research to provide an overview of the regulation and governance of children s access to difficult knowledge particularly knowledge of sexuality explore and develop Foucault s work on the relationship between childhood and sexuality identify the impact of these discourses on adults understanding of childhood and the tension that exists between their own perceptions of sexual knowledge and the perceptions of children reconceptualise children s education around sexuality Innocence Knowledge and the Construction of Childhood is essential reading for both undergraduate and postgraduate students undertaking courses in education particularly with a focus on early childhood or primary teaching as well as in other disciplines such as sociology gender and sexuality studies and cultural studies **Beyond Quality in Early Childhood Education and Care** Gunilla Dahlberg, Peter Moss, Alan R. Pence, 1999 Working with postmodern ideas Beyond Quality in Early Childhood Education and Care challenges received wisdom and the tendency to reduce philosophical issues of value to purely technical issues of measurement and management In its place it offers alternative ways of understanding early childhood early childhood

institutions and pedagogical work It gives full consideration to the importance of social construction and meaning making and to documentation and dialogue The book places issues of early childhood into a global context and relates them to writers from many fields Drawing on work with aboriginal peoples in Canada on the experience of Reggio Emilia in Italy and on a project in Stockholm inspired by Reggio the book considers the implications of these alternative ways of understanding for practice and a reconceptualization of early childhood education and care

**From Children's Services to Children's Spaces** Peter Moss,Pat Petrie,2005-08-09 At the turn of the millennium attitudes and actions towards children are increasingly contradictory and complex This work explores these apparent contradictions and complexities through a critique of the concept of children s services
