China Race:

The China Race Fei-Ling Wang, 2024-02-01 Following its two prequels *The China Order* 2017 and *The China Record* 2023 this book analyzes the China Race the global competition for power and leadership between the US led West and the People's Republic of China Considering the organizational options and optimality with respect to human civilization Fei Ling Wang discusses two alternative world orders the Westphalian System of international relations and a centralized world political unification Both are feasible and existed before but with drastically different desirability The rising power of the PRC state has consistently and methodically sought to recenter and reorganize the world to safeguard and promote its autocracy and ultimately build a world empire Examining the nature aims means accomplishments pitfalls and failures of Beijing's foreign policy and the state of and developments in Sinology and the West's China policy Wang focuses on the existential PRC USA rivalry and proposes a holistic strategic framework discussing three ranked objectives for the West and the world including the Chinese people to manage benefit from and prevail in the China Race

African Transnational Mobility in China Roberto Castillo, 2020-12-29 Considering the African presence in China from an ethnographic and cultural studies perspective this book offers a new way to theorise contemporary and future forms of transnational mobilities while expanding our understandings around the transformations happening in both China and Africa The author develops an original argument and new theoretical insights about the significance of the African presence in Guangzhou and presents an invaluable case study for understanding particular modes of transnational mobility More broadly it challenges forms of representing and producing knowledge about subjects on the move and it transforms existing theorisations and critical understandings of mobility and its shaping power Through an ethnographic approach the book brings us closer to a number of practices features and objects that while characterising the lives of Africans in Guangzhou are also evidence of the interplay between individual aspirations and the structural constraints embedded in contemporary regimes of transnational mobility Raising critical questions about ways of unbelonging in the precarious settings of neoliberal modernity and the future of African mobilities this book will be of interest to scholars of transnational African and Chinese Studies
