China Review 1998 China Review:

China Review 1998 Joseph Y. S. Cheng, 1998 Critical reviews of various developments in China and the Hong Kong Special Administrative Region *Country Review* Robert C. Kelly, Debra Ewing, Stanton Doyle, Denise Youngblood, 1998-07-01 [The Management of Enterprises in the People's Republic of China](#) Anne S. Tsui, Chung Ming Lau, 2012-12-06 The Management of Enterprises in the People's Republic of China aims to contribute to the knowledge base of management within the Chinese context The book begins with a mapping of research on management in PRC and offers theoretical insights for cross context institutional and behavioral studies It then reports the results of fourteen empirical studies of management issues in the PRC firms The issues studied include SOE transformation globalization governance employment relationships managerial networks corporate culture and leadership Also included are studies on the knowledge management process and management team characteristics of high technology firms The methods of study include large scale surveys case studies and interviews The contributors are international experts in Chinese management research Finally we offer executive perspectives on several successful firms operating in China through interviews with their CEOs [China Review](#), 1922 **China's Mongols at University** Zhenzhou Zhao, Wing On Lee, 2010-04-09 Minority students in China often receive preferential treatment for access to universities However very little is known about minority student experiences and perceptions on campus after they are accorded what is called meaningful access to university The Mongols emerged as a distinct ethnic group in China starting in the 11th century and in the centuries that followed conquered a large part of the world However in modern times this nomadic people's influence has declined and even their survival in China has been threatened This decline is evidenced by the fact that increasing numbers of Mongols have abandoned their native language and traditional customs especially those who live in cities How do Mongol university students who form the backbone of the Mongol intellectual community identify themselves in a modern Chinese context How do they react as university students to the way in which their culture is recognized and represented Do Mongol students suffer from injustice in the cultural dimension of campus life China's Mongols at University Contesting Cultural Recognition seeks to answer these questions Zhenzhou Zhao addresses these issues by comparing the university discourse on minority culture policy institutional structure and daily life and the Mongol student discourse concerning their experiences perceptions of recognition and dedication to self representation on campus Additionally Gao compares three universities in China Located in Inner Mongolia Autonomous Region Beijing and Hubei Province respectively each of these universities represents one of three types of higher education accessible to minority students in China universities located in ethnic areas standard universities and universities for nationalities China's Mongols at University explores and discusses an intrinsic connection between marketization and globalization and the disadvantages faced by minority groups This book argues that China must move from a policy of preferential treatment **China Review**, 2007 [Communication Campaigns and National Integration in China's](#)

Market Economy Era Yanru Chen,2015-09-01 This book adopts the method of grounded theory in studying national communication campaigns in China referred to as propaganda campaigns in the Chinese linguistic context The study provides an exploratory and descriptive analysis of the ways in which the media in China fulfilled their function of building a Socialist spiritual civilisation and maintaining national integration during state propaganda campaigns Explanations for the success and limitations of the campaigns are clearly expressed and combined with cautious statements on the limited role of the media in the process of national integration The three major communication campaigns detailed in this book offer revelations regarding how to maintain mass morale and revive the national spirit at a time when economic pursuits and aspirations seem to be the top priority for individuals and institutions A chief premise underpinning this study is that economic growth is not to be equated with social progress or human development the latter encompassing a far more profound spiritual dimension which takes far more delicate efforts to accomplish **China Review International** ,2010

China Monthly Review ,1925 **China's Search for Energy Security** Suisheng Zhao,2014-06-11 China's rapid economic growth in the recent decades has produced an unprecedented energy vulnerability that could threaten the sustainability of its economic development a linchpin to social stability and ultimately the regime legitimacy of the Chinese Communist Party CCP as well as the foundation for China's rising power aspirations What is the Chinese perception of the energy security and challenges how has the Chinese government responded to the challenges What are the international implications of China's search for energy security This collection of contributions by leading scholars seeks answers to these extremely important questions The book is divided into three parts Part I presents an overview of China's sense of energy security and its strategic responses Part II examines China's energy policy making processes the efforts to reform and reorganize the energy sector and reset policy priorities Part III focuses on the international implications of China's search for energy security This book consists of articles published in the Journal of Contemporary China **Reader's Guide to the Social Sciences** Jonathan Michie,2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense **The China Weekly Review** ,1925 *China Review* ,2003 America's Space Sentinels Jeffrey Richelson,1999 During much of the Cold War America's first line of defense was in outer space a network of secret satellites that could provide instant warning of an enemy missile launch The presence of these infrared sensors orbiting 22 000 miles above the earth discouraged a Soviet first strike and stabilized international relations between the superpowers and they now play a crucial role in monitoring the missile programs of China India and other emerging nuclear powers Jeffrey Richelson has written the first comprehensive history of this vital program tracing its evolution from the late 1950s to the present He puts Defense Support Program

operations in the context of world events from Russian missile programs to the Gulf War and explains how DSP s infrared sensors are used to detect meteorites monitor forest fires and even gather industrial intelligence by seeing the lights of steel mills

Trade policy review World Trade Organization,1999 *China Perspectives* ,2000 **The Dynamics of Chinese Regional Development** Jane Golley,2007 This book surveys the competing or sometimes complementary roles of the state and the market in shaping China s pattern of regional development during the Communist era The uneven pace of industrialisation across China s provinces during its economic transition raises numerous questions regarding spatial patterns of industrial development in a developing transitional economy Jane Golley s book answers questions such as Why have inter regional inequalities in industrial development come to exist Why are they tending to increase How have regional policies and reform strategies impacted on these trends How if at all can these trends be reversed A comparative economic systems analysis of the Mao and Deng eras combined with theoretical and empirical evidence of the disequilibrium nature of regional development depicts the recent trend of rising inequality across China as being both inevitable and ongoing The central government s Western Development Strategy is assessed in this context The most novel contribution of the book is the development of a framework for thinking about regional development and policy which combines two distinct approaches new economic geography and comparative economic systems analysis which can be used to understand patterns of regional development anywhere in the world The application of this framework to regional development during the Mao and Deng eras provides a uniquely holistic and easy to read coverage of the topic The Dynamics of Chinese Regional Development will appeal to undergraduate and postgraduate students of the Chinese economy The book will also find an audience in scholars and researchers of Chinese and Asian studies more generally as well as students and scholars of economics political economy and regional science

Current Politics and Economics of Asia ,2004 **Oecd Environmental Performance Reviews** ,2007 *Globalization in the Asian Region* Gloria L. Davies,Gloria Davies,Chris Nyland,2004 Bringing together contributors from both the university sector and business centered research institutions this comprehensive volume offers diverse perspectives on the impacts and consequences of globalization in different parts of the Asian region Each chapter offers a substantial account of globalization within a particular nation state or area in the region Different understandings underpin the chapters Some contributors perceive globalization as progress in the form of economically driven processes that have made nations mutually dependent in unprecedented and complex ways Others emphasize the uneven outcomes of globalization as well as the stakes for economic growth and social order in the global climate of deepening political and religious divisions since September 2001 General and specialist readers alike will gain an appreciation of the myriad emphases placed on globalization within different nations and from various vantage points The book showcases diverse styles of discourse and serves to greatly broaden the scope of what can be discussed under the rubric of globalization within a single volume
