China Review 2000:

China Review 2000 Chung-Ming Lau, Jianfa Shen, 2000 The showing of sophisticated modern weapons during the fiftieth anniversary of the Chinese Communist Party heralded China's emergence as a great power in the arena of politics. At the same time China was finally admitted to the World Trade Organization after thirteen years negotiation. With its two digit GNP annual growth rate China seemed poised to become the second largest economy in the world. Many analysts argue that China will play an increasingly important role in the future whether in politics or economics. *China Review 2000* features a review of overall changes in the political, economic, social and business environments during the past twenty years of reform along with perspectives on major issues confronting the People's Republic in the new millennium. *China's Economic Challenge* Neil C. Hughes, 2002 This title lays bare the reality behind China's efforts at economic modernization. The author examines issues such as China's WTO membership, the Three Gorges Project, the widening differences between the urban and rural areas and the situation facing the state enterprises. **China's Accession to the World Trade Organization** Robert Ash, Heike Holbig, 2013-04-03 With China's accession to the World Trade Organization imminent, this book brings together the expert views of scholars, policy makers and business representatives on the consequences of this historic event. Insight into the past and future of China's relationship to the WTO is offered by authors involved on both sides of the negotiations on the EU-China bilateral agreement of May 2000 and the on-going negotiations up to spring 2001. An analyst and representatives from four economic sectors: the automobile industry, telecommunications, insurance and banking, clash over their predictions for the future. Also presented is an investigation of the challenges for China's political, social and legal systems and revealing prognoses are given for the implications for global trade and investment flows for the EU and Greater China and for the modus operandi of the WTO itself. By shedding light on economic effects and social and legal implications, the book gives a comprehensive picture of potential challenges arising from China's entry to the WTO. The Management of Enterprises in the People's Republic of China Anne S. Tsui, Chung Ming Lau, 2012-12-06 The Management of Enterprises in the People's Republic of China aims to contribute to the knowledge base of management within the Chinese context. The book begins with a mapping of research on management in PRC and offers theoretical insights for cross-context institutional and behavioral studies. It then reports the results of fourteen empirical studies of management issues in the PRC firms. The issues studied include SOE transformation, globalization, governance, employment relationships, managerial networks, corporate culture and leadership. Also included are studies on the knowledge management process and management team characteristics of high technology firms. The methods of study include large scale surveys, case studies and interviews. The contributors are international experts in Chinese management research. Finally, we offer executive perspectives on several successful firms operating in China through interviews with their CEOs. **China Review International**, 2002 **China's Geography** Gregory Veeck, 2007 Offering the first sustained geography of the reform era, the authors trace the changes occurring in this

great and ancient nation across both time and space

Rural Education in China's Social Transition Peggy A. Kong, Emily Hannum, Gerard A. Postiglione, 2020-12-17 In the first decade of the twenty first century the People's Republic of China experienced dramatic growth and expansion that altered the educational environment of children. Rapid economic development increased prosperity and educational opportunities for children. Expanded in a wealthier society. Yet a by-product of rising wealth was rising inequality. While the children of the emerging urban middle and elite classes enjoyed new prosperity, the children of the persistently poor in rural communities continued to experience challenges such as food insecurity, illness, hardships of family separation and migrant life on the margins of the cities. This time period saw a large resource gap emerge between the home conditions of poor rural children compared with those of their wealthier urban counterparts. This book highlights the complexities China has experienced in seeking to extend full educational access to rural children including rural to urban migrant and ethnic minority children during a momentous period in China. Chapters delve into the experiences, perceptions, strategies and difficulties of rural origin children and their families in the school system and lay bare the challenges of policy initiatives designed to support rural education. We hope the experiences detailed here will be of interest to students and scholars of rural educational policy and practice in China and worldwide.

China's Telecommunications Market Ding Lu, Chee Kong Wong, 2003 The authors examine the singularity of the Chinese experience in building up one of the world's largest telecommunications networks in a period of less than a decade by reviewing China's national industrial policies and institutional reforms within the industry. The reader will find in this volume in-depth analysis of the interplay between political and economic forces amidst the industry's structural overhaul and regulatory reforms. The accounts of industrial features and market conditions are enriched with up-to-date data which are extremely useful for appreciating the development and prospects for this fast-growing market set against the backdrop of China's accession to the WTO.
