Economic Implications of China's Demographics in the 21st Century Mr. Kevin C. Cheng,2003-02-01 This study assesses the economic implications of China's changing population in the 21st century using a numerical general equilibrium model The simulations show that lower fertility rates yield lower saving rates Since lower fertility rates reduce the future supply of labor capital will become less productive Consequently if international capital mobility is high in China a low fertility rate implies more future capital outflows But if capital is less mobile low fertility today lowers the domestic return to capital and raises the domestic return to labor In addition the paper finds no significant link between demographic structures and per capita income growth

Birth Control in China 1949-2000 Thomas

Scharping,2013-07-04 This comprehensive volume analyses Chinese birth policies and population developments from the founding of the People's Republic to the 2000 census The main emphasis is on China's Hardship Number One Under Heaven the highly controversial one child campaign and the violent clash between family strategies and government policies it entails Birth Control in China 1949 2000 documents an agonizing search for a way out of predicament and a protracted inner Party struggle a massive effort for social engineering and grinding problems of implementation It reveals how birth control in China is shaped by political economic and social interests bureaucratic structures and financial concerns Based on own interviews and a wealth of new statistics surveys and documents Thomas Scharping also analyses how the demographics of China have changed due to birth control policies and what the future is likely to hold This book will be of interest to students and scholars of Modern China Asian studies and the social sciences Governing China's Population Susan Greenhalgh,Edwin A. Winckler,2005 Governing China's Population tells the story of political and cultural shifts from the perspectives of both regime and society **The Population of Modern China** Dudley L. Poston Jr.,David Yaukey,2013-11-11 Student interested in world populations and demography inevitably need to know China As the most populous country of the world China occupies a unique position in the world population system How its population is shaped by the intricate interplays among factors such as its political ideology and institutions economic reality government policies sociocultural traditions and ethnic divergence represents at once a fascinating and challenging arena for investigation and analysis Yet for much of the 20th century while population studies have developed into a mature science precise information and sophisticated analysis about the Chinese population had largely remained either lacking or inaccessible first because of the absence of systematic databases due to almost uninterrupted strife and wars and later because the society was closed to the outside observers for about three decades since 1949 Since the end of the Cultural Revolution things have dramatically changed China has embarked on an ambitious reform program where modernization became the utmost goal of societal mobilization China could no longer afford to rely on imprecise census or survey information for population related studies and policy planning nor to remaining closed to the outside world Both the gathering of more precise information and access to such information have dramatically increased in the 1980s Systematic observations analyses and reporting about the Chinese population have surfaced in the population literature around the globe **Accepting Population Control** Cecilia Nathansen Milwertz,2024-11-01 China's one child family policy has been applauded by demographers and condemned by human rights activists This study argues that most city district Chinese women would prefer more children yet comply with the one child policy because they accept the moral legitimacy of state policy Fatal Misconception Matthew James Connelly,2008 Listen to a short interview with Matthew Connelly Host Chris Gondek Producer Heron Crane Fatal Misconception is the disturbing story of our quest to remake humanity by policing national borders and breeding better people As the population of the world doubled once and then again well meaning people concluded that only population

control could preserve the quality of life This movement eventually spanned the globe and carried out a series of astonishing experiments from banning Asian immigration to paying poor people to be sterilized Supported by affluent countries foundations and non governmental organizations the population control movement experimented with ways to limit population growth But it had to contend with the Catholic Church s ban on contraception and nationalist leaders who warned of race suicide The ensuing struggle caused untold suffering for those caught in the middle particularly women and children It culminated in the horrors of sterilization camps in India and the one child policy in China Matthew Connelly offers the first global history of a movement that changed how people regard their children and ultimately the face of humankind It was the most ambitious social engineering project of the twentieth century one that continues to alarm the global community Though promoted as a way to lift people out of poverty perhaps even to save the earth family planning became a means to plan other people s families With its transnational scope and exhaustive research into such archives as Planned Parenthood and the newly opened Vatican Secret Archives Connelly s withering critique uncovers the cost inflicted by a humanitarian movement gone terribly awry and urges renewed commitment to the reproductive rights of all people
