China's Capitalism Tobias ten Brink, 2019-04-05 Since 1978 the end of the Mao era economic growth in China has outperformed every previous economic expansion in modern history While the largest Western economies continue to struggle with the effects of the deepest recession since World War II the People's Republic of China still enjoys growth rates that are massive in comparison In the country's smog choked cities a chaotic climate of buying and selling prevails Tireless expansion and inventiveness join forces with an attitude of national euphoria in which anything seems possible No longer merely the workshop of the world China is poised to become a global engine for innovation In China's Capitalism Tobias ten Brink considers the history of the socioeconomic order that has emerged in the People's Republic With empirical evidence and a theoretical foundation based in comparative and international political economy ten Brink analyzes the main characteristics of China's socioeconomic system over time identifies the key dynamics shaping this system's structure and discusses current trends in further capitalist development He argues that hegemonic state business alliances mostly at the local level relative homogeneity of party state elites the maintenance of a low wage regime and unanticipated coincidences between domestic and global processes are the driving forces behind China's rise He also surveys the limits to the state's influence over economic and social developments such as industrial overcapacity and social conflict Ten Brink's framework reveals how combinations of three heterogeneous actors party state institutions firms and workers led to China's distinctive form of capitalism Presenting a coherent and historically nuanced portrait China's Capitalism is essential reading for anyone interested in the socioeconomic order of the People's Republic and the significant challenges facing its continuing development

The Myth of Chinese Capitalism Dexter Roberts, 2020-03-10 The vivid provocative untold story of how restrictive policies are preventing China from becoming the world's largest economy Evan Osnos Dexter Roberts lived in Beijing for two decades working as a reporter on economics business and politics for Bloomberg Businessweek In The Myth of Chinese Capitalism Roberts explores the reality behind today's financially ascendant China and pulls the curtain back on how the Chinese manufacturing machine is actually powered He focuses on two places the village of Binghuacun in the province of Guizhou one of China's poorest regions that sends the highest proportion of its youth away to become migrants and Dongguan China's most infamous factory town located in Guangdong home to both the largest number of migrant workers and the country's biggest manufacturing base Within these two towns and the people that move between them Roberts focuses on the story of the Mo family former farmers turned migrant workers who are struggling to make a living in a fast changing country that relegates one half of its people to second class status via household registration land tenure policies and inequality in education and health care systems In The Myth of Chinese Capitalism Dexter Roberts brings to life the problems that China and its people face today as they attempt to overcome a divisive system that poses a serious

challenge to the country's future development. In so doing, Roberts paints a boots-on-the-ground cautionary picture of China for a world now held in its financial thrall. Chinese Capitalism in a Global Era Henry Wai-Chung Yeung, 2004-03. Yeung examines overseas Chinese capitalism in East and Southeast Asia in a time of accelerated globalization and the evolution of Chinese capitalism through the participation of political and business elites in the global economy. *Chinese Capitalism in Southeast Asia* Yos Santasombat, 2017-09-04. This collection examines the historically and geographically specific form of economic organization of the overseas Chinese in Southeast Asia and how it has adapted to the different historical and socio-political contexts of Southeast Asian countries. Moving beyond cultural explanations and traits to focus on the process of evolution and dynamism of situated practices, it argues that Chinese Capitalism is rapidly becoming a form of hybrid capitalism and embodies the interdependent of culturally and institutionally specific dynamics at local and regional level, evolving and adapting to different institutional contexts and politico-economic conditions in the host Asian economies. This text also explores the social organization and political economy of the so-called overseas Chinese by examining the changing dynamism of Chinese capitalism in relation to forces of globalization. Focusing on key actors, primarily Chinese entrepreneurs in their business practices and situated practices, as well as cultural, political, social, and economic factors under globalizing conditions, it provides a broad understanding without fixating or homogenizing Chinese capitalism, contributing to the understanding of the contexts that give rise to the emergence and transformation of Chinese Capitalism in Southeast Asia.

Contrasting Japanese & Overseas Chinese Capitalism Gwynne Maret Murphy, 1996. **Communists constructing capitalism** Julian Gruin, 2019-07-04. Why has China's transition to a market economy not catalysed corresponding political transformation? In an era of deepening synergy between authoritarian politics and capitalist economics, this book offers a novel perspective on this central dilemma of contemporary Chinese development, shedding light on how the Chinese Communist Party achieved rapid economic growth while preserving political stability. Drawing on extensive fieldwork and over sixty interviews with policymakers, bankers, and former party and state officials, the book delves into the role of China's state-owned banking system since 1989, showing how political control over capital has been central to the country's

experience of capitalist development It challenges existing state market paradigms of political economy and reveals the Eurocentric assumptions underpinning liberal perspectives towards Chinese authoritarian resilience

Chinese Capitalism, 1522-1840 Dixin Xu, Cheng-ming Wu, 2000 This text offers a guide to China's long economic history and to the embryonic development of Chinese capitalism It makes a work of Chinese economic history from Chinese scholars available in abridged form in English The historic sweep runs from the Late Ming period through the early and mid Qing to the time of the Opium wars In each period there are detailed surveys of sectors of the economy both industrial and agricultural and of the technological development and methods used in addition to overviews of the nature of economic change in China and the retarded development of capitalism prior to the 19th century

Chinese Capitalism and the Modernist Vision Satyananda Gabriel, 2004-08-02 China's economy is now comfortably among the world's elite in terms of size This book examines the contemporary Chinese economy focusing on the production appropriation and distribution of surplus value

The Future of Chinese Capitalism Gordon Redding, Michael A. Witt, 2010-01-07 Much has been said about the re emergence of China to its historical position of eminence in the world economy yet little is understood about the kind of economic system China is evolving What are the rules of the game of business in today's China and how are they likely to change over the next decades The answers to these questions are crucial to business persons formulating strategy toward China but also for policy makers concerned with retaining the competitiveness of their nations in the face of Chinese competition and for researchers seeking to gain deeper insights into the workings of economic systems and institutional change Written by two leading experts in the field this book sheds much needed light on these questions Building on recent conceptual and empirical advances and rich in concrete examples it offers a comprehensive and systematic exploration of present day Chinese capitalism its component parts and their interdependencies It suggests that Chinese capitalism as practiced today in many respects represents a development from traditional business practices whose revival has been greatly aided by the influx of investments and managerial talent from the Regional Ethnic Chinese On the basis of present trends in the Chinese economy as well as through comparison with five major types of capitalism those of France Germany Japan Korea and the United States the book derives a prediction of the probable development paths of Chinese capitalism and its likely competitive strengths and weaknesses

Commerce and Capitalism in Chinese Societies Gary G. Hamilton, 2006-05-24 Consisting of sixteen articles which together provide historical comparative and theoretically informed perspectives on the spread of Chinese capitalism this collection emphasizes the difference between Western and Chinese forms of capitalism

China and Capitalism David Faure, 2006-01-01 Written by one of the most distinguished experts on China's economic and business history China and Capitalism provides a highly original and at the same time clear and readable approach to understanding the development of business in China from 1500 to the 1990s David Faure then uses the picture he has assembled to shed new light on the strengths and weaknesses of Chinese business

today The book is written to be accessible to people with little background in China or Chinese business practice Dr Faure describes three phases in the development of Chinese business from the sixteenth to the twentieth century In the traditional phase from the sixteenth to the eighteenth century Chinese business relied on contracts as well as on ritual propriety In the modernizing phase from the second half of the nineteenth century to the first half of the twentieth century Chinese business had to adapt to the introduction of company law and legal standards of accounting In the contemporary phase from the middle of the twentieth century to the present day China emerged from a control economy to a vibrant market by embracing once again the changes introduced in the modernizing phase General readers including students and teachers in courses touching on but not primarily devoted to the Chinese experience will find in this book the most comprehensive account of China s business development in the last five centuries and many insights into the workings of China s modern business scene Specialist readers will find a highly original approach to the history of business in China Chinese Capitalisms Y. Chu,2010-01-13 In Chinese Capitalisms experts examine the rise of capitalism on China and Taiwan analyzing impacts exerted by global capitalism Chinese civilization and remnants of socialist practice In focusing on these they also address longstanding issues such as Weber s China Thesis state business relationships and China s civil society among others

Chinese Capitalism and Economic Integration in Southeast Asia Yos Santasombat,2018-04-12 China s rise exerts a powerful pull on ASEAN economies and constitutes an impetus for a resinicization of Overseas Chinese in Southeast Asia China has become a skilled practitioner of commercial diplomacy and as long as it continues to lead the way in regional integration China s state led capitalism will seek to integrate itself into the ASEAN Economic Community This in effect becomes China s essential strategy of desecuritization for the region With increasing trade and investment between China and ASEAN countries the ethnic Chinese economic elites have managed to serve as connectors and bridges between the two sides and benefited in the process from joint ventures and business investments The impact of new Chinese Capitalism on SMEs however has not been equally positive As China rises Southeast Asia has witnessed increased complexity and variations of hybrid capitalism including alliances between state led capitalism transnational entrepreneurs emanating from China s going out policy and ethnic Chinese in Southeast Asia Three main forms of Chinese Capitalism in Southeast Asia are neoliberal capitalism flexible capitalism and Confucian capitalism These intermingle into a range of local varieties under different socio economic conditions The Spirit of the Chinese Revolution Arthur Norman Holcombe,1930 **The**

Chinese Communist Party and China's Capitalist Revolution Lance Gore,2010-11-08 The Chinese Communist Party and China s Capitalist Revolution examines issues of political change and development in China In the last 30 years China has experienced a profound political transformation and a degree of political progress but these are largely mired in the assumption that the free market is inherently incompatible with communism and the perceived lack of political reforms in China Indeed there has not been much in the sense of democratization multi party competition freedom of speech and

association but as this book demonstrates political development is not limited to these factors Based on extensive empirical investigations of the impact of the market on the communist party with a particular focus on its grassroots organisations this book finds that the Chinese communist party is undergoing profound changes in a host of important areas By analyzing the impact of China s socioeconomic transformation on the CCP and the adaptations of the Party to the new environment the book takes stock of the nature and dynamics of political change underway in China The author concludes that the Chinese communist party we knew no longer exists it is evolving into something quite different which must have political implications for both China and the rest of the world Professor Lance L P Gore is a political scientist specializing in contemporary Chinese politics at The East Asian Institute National University of Singapore **China and Global Capitalism** L. Chun,2013-12-05 In this concise historical and conceptual analysis of China s evolving position in a world defined predominantly by global capitalist development Lin offers a critical review of relevant debates and discusses the imperative and feasibility of a socialist Chinese model reconstructed as an alternative to standardized modernity at an impasse *Chinese Recorder and Missionary Journal* ,1916 Land Bargains and Chinese Capitalism Meg E. Rithmire,2015-10-06 Land reforms have been critical to the development of Chinese capitalism over the last several decades yet land in China remains publicly owned This book explores the political logic of reforms to land ownership and control accounting for how land development and real estate have become synonymous with economic growth and prosperity in China Drawing on extensive fieldwork and archival research the book tracks land reforms and urban development at the national level and in three cities in a single Chinese region The study reveals that the initial liberalization of land was reversed after China s first contemporary real estate bubble in the early 1990s and that property rights arrangements at the local level varied widely according to different local strategies for economic prosperity and political stability In particular the author links fiscal relations and economic bases to property rights regimes finding that more open cities are subject to greater state control over land
