INTRODUCTION

Many music departments include modules on minimalism in their KS3 and KS4 schemes of work. A contemporary musical style that uses simple repetitive diatonic phrases with catchy rhythms and engaging harmonies has considerable appeal for young students, who can themselves use computer sequencers to devise and develop effective-sounding music in this style.

But what next? For many students and indeed older composers, minimalism can become something of a prescriptive musical *cul de sac* with limited opportunity for further musical development.

The music of John Adams (and indeed the later music of the older minimalist composers such as Steve Reich and Philip Glass) shows how a post-minimalist style can emerge from these foundations, which gives greater scope for a more diverse musical expression.

John Adams first became attracted to this musical style when, as a young student, he was rejecting the rule-based serialist techniques of his professors in music college, which he described as 'a mausoleum where we would sit and count tone-rows in Webern'.

The writings of John Cage provided him with a stimulus for alternative lines of musical enquiry, which, in turn, led to an interest in exploring ways of working with minimalist techniques. At the same time, he was making considerable use of pioneering synthesiser technology in his work, which continues through to the present day.

His 'post-minimalist' style uses many of the hallmarks of minimalism. A steady pulse coupled with repeated diatonic phrases, combined in intricate interlocking rhythms, underpin much of his work. But this is combined with elements we perhaps associate more with Romanticism. So within the course of a single movement, there is often a great deal of development and variety, light and dark, serenity and turbulence, all of which he achieves with judicious use of instrumental colour – orchestral and electronic – and big contrasts in texture, dynamics and tempos.

Another interesting feature of Adams's music is the way in which he draws on an eclectic range of non-classical musical styles, which he feeds directly into his work. Charles Ives is a major influence, and Adams uses the same techniques of musical collage and unusual stylistic juxtapositions in many of his works. His parents were both jazz musicians, and as a youngster Adams listened to a lot of 1960s and 1970s pop and rock music, and aspects of all of these styles can be found in several of his compositions. Indeed, it is these elements that serve to broaden the appeal of his music in reaching a wide and diverse audience of enthusiasts.

Finally, the importance of education. Adams has worked with young musicians from institutes such as New York's Juilliard School and London's Royal Academy of Music, and he has recently taken a post as visiting professor at the Royal Academy. Coupled with the fact that this year we celebrate John Adams's 70th birthday, this means that there should be an increased opportunity to hear his music being played live across the UK over the coming months.
