Childrens Learning Difficulties:

Children and Learning Difficulties Onita Nakra,1996 *Identifying and Supporting Children with Specific Learning Difficulties* Pamela Deponio,Christine Macintyre,2003-12-16 Many children experience difficulties which impact on their learning at home and school Some children are considered to have a specific learning difficulty such as dyslexia or dyspraxia but other children display a range of indicators which cross the boundaries of specific named conditions If teachers are to offer appropriate support the authors of this highly practical book argue that they must look beyond the label to assess the whole child This is an informative book which encourages teachers to consider children as individuals rather than attempting to match them to existing sets of indicators pinpoints the overlap of indicators within different specific learning difficulties considers the process of assessment explains the implications of the children s difficulties offers tried and tested strategies to promote inclusive learning Teachers teaching assistants Special Educational Needs Co ordinators and students undertaking teacher education courses will all find this a refreshingly accessible book [Mathematics for Children with Severe and Profound Learning Difficulties](#) Les Staves,2013-12-19 The book will covers a wide range of approaches to teaching and learning and demonstrates how mathematics can be related to personal and social development communication and thinking skills Written with the non specialist in mind and including plenty of practical examples it will make useful reading for teachers in mainstream and special schools and learning support assistants Early years practitioners and teachers in training may find the book useful for its descriptions of how children acquire their foundation of early mathematics and numeracy skills *Special Teaching for Special Children* Ann Lewis,Brahm Norwich,2004-11-16 I recommend this book as an important contribution to the debate on pedagogy in special education It is largely well written and informative and rich with ideas and opinions Educational Review What if anything is special about teaching children with special or exceptional learning needs This book addresses this question looking at pupils special learning needs including low attainment learning difficulties language difficulties emotional and behavioural problems and sensory needs Some special needs groups for example dyslexia have argued strongly for the need for particular specialist approaches In contrast many proponents of inclusion have argued that good teaching is good teaching for all and that all children benefit from similar approaches Both positions fail to scrutinise this issue rigorously and coherently and it is this aspect which distinguishes this book Leading researchers in each special needs field defend and critique a conceptual analysis of teaching strategies used with particular learner groups with special educational needs Summaries by the editors after each chapter link pedagogic strategies knowledge and curriculum to key points from the chapter and pave the way for discussion This book is indispensable reading for students policy makers researchers and professionals in the field of special educational needs and inclusion Shortlisted for the TES NASEN Book Awards 2005 *How Children Learn* Sean MacBlain,2014-02-17 Understanding How Children Learn is a vital part of working with children Every child is unique and understanding differences in learning helps all to

benefit This book goes beyond simply understanding the work of key theorists and the various theories of learning to recognise what learning actually looks like and how it is best facilitated in any setting Each chapter includes Exercises to help you evaluate your understanding and practice Examples taken from real experiences to illustrate concepts beyond the theory Summaries to help you take the key messages from each chapter Suggestions for further reading to help push your own learning further Looking at key topics such as brain development technology in childhood and barriers to learning this book will explain what learning really is Why not also have a look at the companion title Learning Theories in Childhood to explore the key learning theories Sean MacBlain is Reader in Child Development and Disability at the University of St Mark St John Plymouth

Beyond Special Needs Dr Susan Hart,1996-05-28 Susan Hart s book is a welcome relief from the prescriptive empiricism of much current writing on how to respond to the difficulties in learning experienced by many children and young people The detail of the sustained analysis is also in marked contrast to the superficial summarising that often passes for critique Support for Learning The author places a refreshing emphasis upon the dynamic interactional nature of learning and teaching reminding us of the need to recognize the active part played by all pupils in shaping their own learning which is mediated through the agendas which they bring to bear on classroom activities and which may be quite different from those of their teachers International Journal of Inclusive Education This book offers practitioners a new way of thinking about and pursuing concerns about children s learning It sets aside the limiting language of learning difficulties and special needs and suggests an approach which starts from a different perspective This approach assumes that any learning situation always has the potential to yield new ideas for enhancing children s learning if we do the kinds of thinking that open up new possibilities The author offers an account of this innovative thinking suggesting a framework of questions that teachers can use drawing on their existing knowledge and expertise to generate new insight and possibilities for practice She also provides a basis for deciding which possibilities to pursue in the case of a particular child The approach is explained in a practical and usable way for classroom teachers drawing on detailed accounts of children s learning and the outcomes of a research study from which the ideas were derived

Inclusive Special Education Garry Hornby,2014-08-20 Much has been written about special education and about inclusive education but there have been few attempts to pull these two concepts and approaches together This book does just that sets special education within the context of inclusive education It posits that to include effectively all children with special educational needs in schools requires an integration of

both concepts approaches and techniques It has never been more timely to publish a book that helps professionals who work with schools such as psychologists special education professionals and counselors to identify effective practices for children with special needs and provide guidelines for implementing these in inclusive schools **Different Learners** Jane M. Children's Learning Difficulties Julie Dockrell,John McShane,1993-01-15 Many children experience difficulties in learning These difficulties may be specific as occurs when a child experiences problems with some particular task such as reading or they can be more general as occurs when learning is slower than normal across a range of tasks In this book Julie Dockrell and John McShane aim to give a clear account of learning difficulties linking the theoretical with the practical in an accessible framework A central theme of the book is the role that cognitive factors play in learning difficulties What impedes a child s progress in acquiring new knowledge Why are children with learning difficulties impoverished in their use of

strategies How do children with learning difficulties differ from children developing without such problems The authors argue that in order both to assess a child s problems and to design successful intervention programs it is essential to have an understanding of the demands placed on a child s cognitive system and the abilities of that system to deal with these demands They go on to describe the skills and strategies children need in order to read spell talk and use arithmetic they show how to assess what missing skills and techniques lie behind learning difficulties and discuss techniques which can be used to correct and compensate for these problems Throughout the authors aim to give practitioners a way based in theory of evaluating and tackling the problems facing any given child
