China: A Macro History Renyu Huang, 1993

A Macrohistory of the Communist World the making and unmaking of a revolutionary ideal C L Lu, 2025-06-23 A long term and cross regional historical perspective Detailing the rise and fall of communism A Macrohistory of the Communist World tells the history of communism the Communist Party and communist countries from a global perspective introducing important historical events and the life stories of historical figures The book is divided into five parts describing in detail the formation expansion division and collapse of the communist world The regions spanned include four continents Europe Asia

America and Africa The period lasts for two hundred years from the beginning of the 19th century to the 21st century The book also makes necessary statements about the development of capitalism and socialism which are in opposition and competition with communism This is a must read book for anyone who wants to thoroughly understand the Communist Party

China's Long-Term Economic Development Hongjun Zhao,2018-08-31 This book examines the evolution of Chinese governmental governance and its long lasting impact on Chinese economic development firstly by examining the formation of Chinese style governance the core contents of this governance and its vitality compared to other governance patterns in Chinese history Secondly this book discusses the effectiveness of this governance in supporting economic development before the Song dynasty and its failure in serving economic development during the past three to five centuries Ultimately Hongjun Zhao predicts the direction Chinese governance will take in the next 20 years [Policy Metamorphosis in China](#) Xiaojiong Ding,2011-12-01 China has been experiencing great economic and social changes since the late 1970s when the Reform and Opening Up policies were accepted While some Sinologists argue that such changes have made the Chinese structure of authority fragmented and discrepant and have weakened the directive power of the Central Government a few others emphasize that despite a certain degree of economic decentralization and segmentation of public power the Central Government has been seeking ways to hold the nation together Consequently while the former argue that due to the centrifugal nature of the political system policy implementation is bound to deviate from the route specified by the Central Government the latter hold that national policies are carried out faithfully with minor deviations only in certain circumstances This book studies the processes of policy implementation in contemporary mainland China by taking minban private education at the level of basic education in Shanghai as an example Based on 65 interviews conducted during 2001 and 2004 three moduses of policy implementation are proposed and the Model of Structural Fracturation is advanced as the prevailing modus of policy implementation in contemporary China The model argues that policy metamorphosis during implementation is not something random in contrast it is determined by structural factors that no single policy actor can manipulate The pyramid of Chinese politics is a loose construction with vertical and horizontal fracturations between different layers The model highlights the fact that governments at the county district level are remote from and beyond the control of the Central Government and the provinces They deserve more attention than they have received Contrary to Western perspectives which regard the structural fracturation in the Chinese polity as dangerous for national stability and unity this book takes the fracturation as an important and delicate element of the Chinese mode of governance and suggests that the very strength of the state lies in its capacity to tolerate local deviation and to embrace it into national institutions

Macrohistory and Macrohistorians Johan Galtung,Sohail Inayatullah,1997-09-30 Includes information on Asabiya Augustine Christianity decline of civilization evolution Gaia life cycle metaphors shape of macrohistory time weltgeist yin yang etc **People's Wars in China, Malaya, and Vietnam** Marc Opper,2019-11-08 People s Wars in China Malaya and

Vietnam explains why some insurgencies collapse after a military defeat while under other circumstances insurgents are able to maintain influence rebuild strength and ultimately defeat the government The author argues that ultimate victory in civil wars rests on the size of the coalition of social groups established by each side during the conflict When insurgents establish broad social coalitions relative to the incumbent their movement will persist even when military defeats lead to loss of control of territory because they enjoy the support of the civilian population and civilians will not defect to the incumbent By contrast when insurgents establish narrow coalitions civilian compliance is solely a product of coercion Where insurgents implement such governing strategies battlefield defeats translate into political defeats and bring about a collapse of the insurgency because civilians defect to the incumbent The empirical chapters of the book consist of six case studies of the most consequential insurgencies of the 20th century including that led by the Chinese Communist Party from 1927 to 1949 the Malayan Emergency 1948 1960 and the Vietnam War 1960 1975 People s Wars breaks new ground in systematically analyzing and comparing these three canonical cases of insurgency The case studies of China and Malaya make use of Chinese language archival sources many of which have never before been used and provide an unprecedented level of detail into the workings of successful and unsuccessful insurgencies The book adopts an interdisciplinary approach and will be of interest to both political scientists and historians

Governing Health in Contemporary China Yanzhong Huang,2015-03-24 The lack of significant improvement in people s health status and other mounting health challenges in China raise a puzzling question about the country s internal transition why did the reform induced dynamics produce an economic miracle but fail to reproduce the success Mao had achieved in the health sector This book examines the political and policy dynamics of health governance in post Mao China It explores the political institutional roots of the public health and health care challenges and the evolution of the leaders policy response in contemporary China It argues that reform induced institutional dynamics when interacting with Maoist health policy structure in an authoritarian setting have not only contributed to the rising health challenges in contemporary China but also shaped the patterns and outcomes of China s health system transition The study of China s health governance will further our understanding of the evolving political system in China and the complexities of China s rise As the world economy and international security are increasingly vulnerable to major disease outbreaks in China it also sheds critical light on China s role in global health governance

□□□□ ,1988 **Class Struggle and Deviant Labeling in Mao's China** Wenhui Cai,2001 This study investigates the entire process of deviant labeling under the leadership of Chairman Mao between 1950 and 1978 Through the use of life history materials that include autobiographies and memoirs published in both English and Chinese the causes of the labeling the lives of the deviants and the consequences of deviant labels on individuals family members and significant others are thoroughly analyzed It documents the impacts of labeling on the self concept of deviants and the creation of a new socially and politically defined deviant class the enemies of the people in Mao s China
