China At The Crossroads:

China at the Crossroads Peter Nolan, 2013-05-09 This concise and timely book written by one of the world's leading authorities on China argues that the country is at a crossroads in its development and explores the challenges that lie ahead. A concise and timely book about China and its future which argues that the country is at a crossroads in its development. Written by one of the world's leading authorities on China. Explores the challenges facing China's leadership in the 21st Century including poverty and inequality, the global business revolution, the environment, the capability and role of the state, international relations, the communist party, and the economy. Puts forward a concrete view about the course China should follow in the coming decades.

1943 Joseph Esherick, Matthew T. Combs, 2015 In the grand narrative of modern Chinese history, 1943 is usually passed over with little notice. Great attention has been paid to critical watersheds in Chinese history: the end of the empire in 1911, the outbreak of full-scale war with Japan in 1937, or the triumph of the Chinese Communist revolution in 1949. What can we learn if we focus attention on a less dramatic year? In 1943, in the middle of World War II, the Allies renounced the unequal treaties. Chiang Kai-shek wrote *China's Destiny* and met with Roosevelt and Churchill at Cairo, and Mme Chiang made her memorable trip to the United States. From the northwestern province of Xinjiang to the southern smuggling entrepot of Guangzhouwan, the stories of calculating politicians, suspected spies, starving peasants, downtrodden intellectuals, recalcitrant preachers, and star-crossed actors come together to illuminate the significance of this year for China as a whole. In thirteen topical chapters, both the achievements and the disappointments of 1943 are explored in an effort to capture a moment in time when China stood at a crossroads but the road ahead lay shrouded in the impenetrable fog of war.

China At The Crossroads F. Gilbert Chan, 2019-03-08 Concentrating on a transitional epoch, 1927-1949, when China was at the crossroads of revolution, this book analyzes the Kuomintang's inherent weaknesses as a revolutionary force and the Communists' success in the quest for new formulas to guide the modernization movement.

China at the Crossroads François Godement, 2012 China has reached a crossroads. After years of political stability and enviable economic growth, the regime has been facing a stark choice about how the country should move forward. But two crucial recent political events have turned Chinese politics on its head and are forcing it to decide whether to regress or reform. Over the last year, villagers in Wukan in Guangdong province rose up and ousted their corrupt local leaders after months of protest. Meanwhile, Bo Xilai, the Communist Party secretary in Chongqing, who used Maoist rhetoric and violence to push his vision of economic development, was ousted from his post in March. In a new ECFR essay, *China at the crossroads*, François Godement argues that these two events signal that the Chinese government may be choosing the path of legal and political reform, promoting sustainable growth to reduce macroeconomic imbalances and overreliance on the dollar. François argues that with seven of the nine Politburo Standing Committee members due to be replaced this year, there has been a battle for influence with reformers warning that China is facing a success trap of an economic and political model unsuited to the current stage of

development and capture by vested interests The Wukan uprising and Bo Xilai's fall have been followed by a resurgence in debate about economic liberalisation and censorship of nationalist populist and conservative websites and spokesmen Chinese economic policy began to change from the summer of 2011 Beijing has started to sell US Treasury holdings cool inflation and slow down investment Its trade surplus became a 31 billion monthly deficit in February 2012 These figures suggest the voice of reformers is gaining ground Vested interests opposed to reform include the military industrial complex that is used to double digit budget increases state owned enterprises that have formed monopolies family clans local bureaucrats and the security propaganda apparatus The growth of an educated and affluent middle class who demand rights and better social protection has added to calls for reform China has around 550 million internet users and 350 million social media users who have shown their influence after events such as the Sichuan earthquake and the Wenzhou train crash Between 1978 and 2012 China's per capita income rose from 278 to 6200 World Bank Between 1980 and 2010 the number of Chinese below the poverty line defined as 1.25 a day in purchasing power parity terms fell from 23% of the population to 13% For the first time since 1998 from July to December 2011 China started selling US Treasury holdings bringing the total amount down by 13% from its record high of 1.315 trillion Publisher's description
