The Routledge Advanced Chinese Multimedia Course Kunshan Carolyn Lee, Hsin-hsin Liang, Liwei Jiao, Julian Wheatley, 2014-03-26 The Routledge Advanced Chinese Multimedia Course Crossing Cultural Boundaries is an innovative multimedia course for advanced students of Chinese. Written by a team of highly experienced instructors, the book offers advanced learners the opportunity to consolidate their knowledge of Chinese through a wide range of activities designed to build up both excellent language skills and cultural literacy. Divided into four thematic units covering popular culture, social change, cultural traditions and politics and history, with each unit presenting three individual lessons, the volume provides students with a structured course which efficiently supports the transition from an intermediate to an advanced level. The many different texts featured throughout the lessons present interesting and accurate information about contemporary China and introduce students to useful vocabulary, speech patterns and idiosyncratic language usage. Key features include:

- Lively and detailed discussions of grammatical points and sentence patterns
- Engaging exercises for developing grammatical concepts and insight into the character writing system
- Systematic review of earlier material to ensure consolidation of learning
- Coverage of diverse and culturally relevant topics such as online dating, changing views of marriage, food culture, Confucianism and democracy in China
- Extensive cultural and historical notes providing background to the subjects presented
- Complementary downloadable resources to enhance listening skills
- Free companion website <http://duke.edu/web/chinesesoc> offering a wealth of video content forming the basis of many of the listening activities linked to topics within the book

Teaching and Learning Chinese as a Foreign Language Janet Zhiqun Xing, 2006-01-01 This book provides a research-based account of how to teach and learn Chinese as a foreign language. In addition to the discussion of relevant second foreign language research, this volume gives detailed information on ways to develop a pedagogical model that is uniquely suited to teaching Chinese in five key areas: pronunciation, tones and pinyin characters and words, sentences, when and why different sentence structures are used, discourse and pragmatic competence, coherence and genre, and cultural competence. Specially written for Chinese language teachers, student teachers and applied linguists, this is the first book written in English that systematically addresses all major aspects involved in teaching and learning Chinese as a foreign language.
