## **China The Hungry Dragon:**

**China** John Scott, 1967      China, the Hungry Dragon John Scott,      **The Hungry Dragon** Sigfrido Burgos Cáceres, Sophal Ear, 2013 China's ubiquitous presence in Africa Asia and Latin America is reshaping the world with regards to economics politics and national security This book offers a comprehensive examination of China's energy security strategy

*China, the Hungry Dragon* John Scott, 1967      **The Hungry Dragon** David S. Rosenberg, 2008-09 By 2016 second term president William Claymore struggles with political infighting that stagnates vital improvements in American social and economic programs Media reporters criticize possible solutions and bias frustrated citizens against his administration New China Republic NCR leaders cast aside repressive communism and China becomes a nation of aggressive capitalists who increase efficiency and destabilize world economies To maintain economic growth the NCR government needs natural resources and they annex Russian territory by force Their new remote controlled hypersonic aircraft with laser weaponry dominate the skies while the United States government searches for an alternative to war between two superpowers President Claymore caught in a maelstrom of foreign and domestic crises must contend with the First Lady's terminal illness When the president's extra marital relationship with his biographer Genevieve Hollings threatens to destroy the First Family the scandal enrages the nation's citizens Mocked as the do nothing president Claymore seems powerless to stop NCR military initiatives while embroiled in domestic chaos

**The Hungry Dragon** Sigfrido Burgos Cáceres, Sophal Ear, 2013-04-02 This volume provides an up to date and accessible examination of China's global search for resources focusing primarily on oil This focus provides a powerful rationale to explain China's actions overseas as it impacts on economic energy and foreign policies A strong feature of the book is a comprehensive examination of geopolitical issues Three country case studies Angola Brazil and Cambodia are complemented by two chapters on opportunities and risks to China and an examination as to how strategies are developed into tangible actions This book also examines a number of overlapping debates regarding the varieties of capitalisms autocratic vs democratic the urgent need for rebalancing as the world undergoes global crises and the issues surrounding natural resources in the context of governance liberal oriented notions and poverty traps The book is aimed at general as well as specialized readers and examines the subject in relation to international affairs especially how the geopolitics of scarcity is driving states to be tenser more observant of each other and more acute to foreign initiatives

The Hungry Dragon David Sturgess, 2013 This thesis examines the role that China's search for natural resources plays in its overall approach to engaging with Pacific Island countries PICs and how the resource richness of PICs influences the manner of China's engagement with these countries Using a most similar design with differing main independent variables across two case studies China's engagement with the resource rich Papua New Guinea and the resource scarce Samoa are compared and contrasted over a five year period stretching from 2005 2009 Chinese economic aid and public diplomacy efforts to project its soft power in the region function as tools for tracking and

analyzing China's engagement with PICs Analysis of the two cases shows that China gives more aid to the resource rich PNG than the resource scarce Samoa In assessing China's public diplomacy efforts China has an almost uniform public diplomacy effort to project its soft power towards both the resource rich PNG and resource scarce Samoa These findings reveal a foreign policy strategy that is multi faceted in contrast to most studies that present a Chinese foreign policy strategy in the South Pacific focused almost exclusively on the Beijing Taipei diplomatic rivalry *Lion and Dragon in Northern China* Sir Reginald Fleming Johnston, 1910 *China's Expansion into the Western Hemisphere* Riordan Roett, Guadalupe Paz, 2008-11-01 With President Hu Jintao's November 2004 visit to Latin America China signaled to the rest of the world its growing interest in the region Many observers welcome this development highlighting the benefits of increased trade and investment as well as diplomatic cooperation for both sides But other analysts have raised concerns about the relationship's impact on Latin American competitiveness and its implications for U S influence in Washington's traditional backyard In *China's Expansion into the Western Hemisphere* experts from Latin America China and the United States as well as Europe analyze the history of this triangular relationship and the motivations of each of the major players Several chapters focus on China's growing economic ties to the region including Latin America's role in China's search for energy resources worldwide Other essays highlight the geopolitical implications of Chinese hemispheric policy and set recent developments in the broader context of China's role in the developing world Together they provide an absorbing look at a particularly sensitive aspect of China's emergence as a world power Contributors include Christopher Alden London School of Economics Robert Devlin ECLAC Francisco Gonzalez Johns Hopkins SAIS Monica Hirst Torcuato Di Tella University Josh Kurlantzick Carnegie Endowment for International Peace Xiang Lanxin Graduate Institute of International Studies Geneva Luisa Palacios Barclays Jiang Shixue Chinese Academy of Social Sciences Barbara Stallings Brown University Juan Tokatlian San Andrés University and Zheng Kai Fudan University **China's Strategic Interests in the South China Sea** Sigfrido Burgos Cáceres, 2013-10-15 This title will explore China's strategic interests in the South China Sea with a specific emphasis on power projection and resource security China's regional actions and reactions are reshaping the power dynamics in East and South East Asia while economic and geopolitical futures depend on the variegated outcomes of these complex relationships with neighbours and the West An introductory section will be complemented by four case studies Japan Vietnam the USA and the Philippines and the concluding chapter will discuss the importance of the South China Sea to China as its new leadership deals with growing economic and military might *Chinese Investment in Africa* David N. Abdulai, 2016-11-03 China leads the world when it comes to investment and influence on the African continent The extent of Chinese investment in Africa is well known and much has been written about China's foray into Africa However most of the available material has approached this issue by looking at China as the New Colonialist more interested in Africa's vast natural resources than working in partnership for sustained development Whilst China's interest in Africa's resources is evident it is just half of the

story China's foray into Africa goes beyond its appetite for natural resources and into the realm of geo politics and international political economics For example China is all too aware of how it can cultivate Africa's support on global issues at the United Nations and at other international fora Breaking free from the binary arguments and analysis which characterize this topic Professor Abdulai presents a refreshing perspective that China's foray into Africa can produce win win outcomes for China and Africa if Africans really know what they want from China Hitherto each African country has tended to engage China with an individual bucket list acting in isolation and not as part of a wider continent indeed Africa and the African Union does not yet have a coordinated policy towards China For Africa to be able to do that it needs to know where China is coming from the factors that contributed to its awakening and success and the benefits and possible pitfalls of this foray in order to better position itself for a win win engagement with China This book will be a valuable read for policy makers think tanks and students of Africa China studies programmes alike China and Southeast Asia in the Xi Jinping Era Alvin Cheng-Hin Lim, Frank Cibulka, 2018-12-12 In 2012 the Communist Party of China CPC inaugurated the Xi Jinping era when it elected him to be the General Secretary of the CPC The following year Xi was elected President of the People's Republic of China The Xi Jinping era has seen a remarkable transformation of Chinese foreign policy which has been adjusted to facilitate the achievement of what Xi has proclaimed as the Great Rejuvenation of the Chinese Nation Xi's Belt and Road Initiative has become a major element of Chinese economic diplomacy while the Chinese military industrial complex under his leadership has strengthened China's extensive claims in the South China Sea with reclamation works and the installation of military facilities on its occupied islands This edited volume will focus on the countries of Southeast Asia and examine how their relations with China have been transformed in the Xi Jinping era *China's Climate-Energy Policy* Akihisa Mori, 2018-07-04 China's recent climate energy policy an outcome of contemporary challenges has generated conflict of interest amongst major stakeholders Coupled with a boost in demand for oil gas and coal as well as a rapid growth in wind and solar power it has not only affected domestic fossil fuel and renewable energy providers but has also provoked a resource boom affecting development pathways internationally This book therefore seeks to examine the economic social and ecological effects associated with China's climate energy policy Assessing how the policy has been and will be formulated and implemented it analyses the changing use of energy CO2 emissions and GDP as well as social and environmental impacts both domestically and internationally It presents in depth case studies on specific policies in China and on its resource exporting countries such as Indonesia Australia Myanmar and Mongolia At the same time using quantitative data it provides detailed input output and applied computable general equilibrium analyses Arguing that China has actively advanced its climate energy policy to become a leader of global climate governance it demonstrates that China ultimately relocates the cost of its climate energy policy to resource exporting countries This book will be of great interest to students and scholars of energy the environment and sustainability as well as Chinese Studies and economics **A Chinese Appeal to**
