The English-language Press Networks of East Asia, 1918-1945 Peter O'Connor,2010-09-01 This study is the first to assess the combined significance of the English language newspapers of China Japan and Korea in the period 1918 45 It not only frames the English language press networks in the international media history of East Asia but also relates them to media developments in the British world linking Fleet Street to the Empire and Dominions and to the rise of the United States as a broker of international opinion on and in the Asia Pacific The English language newspapers occupied a narrow but significant segment of the public sphere in East Asia in the inter war years As forums of opinion on Japanese Chinese and Western interests in East Asia they also served as vehicles of propaganda particularly during the crisis ridden 1930s and the Pacific War With this examination of the media affiliations editorial line and access to official bodies in East Asia and the West of most of the English language newspapers published in East Asia in the period under review the author demonstrates that these publications formed distinct networks in terms of the editorial positions they took vis a vis the key issues of the day especially Japan s imperial project in East Asia

[How Trade with China Threatens Western Institutions](#) Robert Gmeiner,2021-07-12 This book evaluates the institutional environments of China and the United States and the West more broadly and how they affect their trading relationship with specific emphasis on intellectual property theft and other allegations of unfair competition The economic and political characteristics of the two countries affect the balance of power in their trading relationship with ramifications far beyond jobs and output The major theme is China s ability to free ride on Western institutions through intellectual property theft and extortion This free riding is far more than just infringing patents and reaping profits it creates a combination of incentives for political pressures in the West that diminish the free market and liberal Western values The result is the classic result of free riding underprovision or degeneration of the Western institutions that made the West prosperous and free At the same time China s economic might military prowess and global soft power increase often with deleterious effects for freedom and free markets This book is distinctive because it integrates public choice ideas about economic institutions state action and strategic behavior into international trade It also takes account of the economic characteristics of China and the West and explains why they present a situation that is fundamentally different from other trade disputes Institutions and political influence are central to this book s analysis of trade which can be more dangerous

and more disguised than the welfare gains from trade Providing a concise and lucid distillation of pressing issues this book is critical reading for scholars studying trade with China and its effects on both global and Western innovation economic output soft power and freedom more broadly
