particular its actual functioning in any given society is above all a part of the culture of that society a part of its historical political social and intellectual creation If a black letter approach towards law in the West is under increasing criticism it is particularly unhelpful if not misleading in understanding Chinese law its nature and developments Rather to understand Chinese law its nature and developments we need to examine the Chinese legal traditions the prevailing political and economic situations Party policies on economic reform and tolerance towards political liberalisation and scholarly discussions and debate This is the approach of this book Its aim is to put Chinese law in context to outline the nature and present status of its development and to analyse the meaning of the law within the Chinese context However this monograph does not ignore the practical needs for determining the precise contents of the black letter law either A study of this kind necessarily involves a process of topic selection However to avoid over generalisation and over simplification it also demands a considerable degree of comprehensiveness in coverage For this reason the book covers what the Chinese scholars term fundamental law and basic branches of law while other topics are covered because they are either crucial for the understanding of the law such as legal traditions in China or of practical importance such as foreign investment and trade Chapter One provides an historical background to traditional Chinese legal culture and modern law reforms The historical background of specific topics is examined as the topics are analysed in the following chapters Chapter Two deals with the changing fate of law under Communist rule Its focus is on the underlying factors and justifications for such changes Chapter Three introduces discussions on specific branches of law from public law constitutional law law making administrative law criminal law criminal procedure law to private law civil law family law contracts law on business entities and law on foreign investment and trade Each of these is dealt with in a separate chapter After the analysis of these substantial topics certain conclusions are drawn which attempt to define the nature of Chinese law and its developments in present day China

**Chinese Law: Context and Transformation** Jianfu Chen, 2015-12-22

Eight years of changes in China have passed since the publication of the previous highly successful edition of this book These changes have not just been about economic development Among the many transformations there has been another quiet peaceful and largely successful but far from perfect revolution in the area of law whose deficiencies have been more often mercilessly examined and documented than have its historical achievements and significance This legal revolution is the subject matter of the present book Like the previous edition it examines the historical and politico economic context in which Chinese law has developed and transformed focusing on the underlying factors and justifications for changes It attempts to sketch the main trends in legal modernisation in China offering an outline of the main features of contemporary Chinese law and a clearer understanding of its nature from a developmental perspective It offers comprehensive coverage of topics such as legal culture and modern law reform constitutional law legal institutions law making administrative law criminal law criminal procedure law civil law property family law contracts law on business entities securities bankruptcy

intellectual property law on foreign investment and trade and implementation of law Fully revised updated and considerably expanded this edition of Chinese Law Context and Transformation is a valuable and important resource for researchers policy makers and teachers alike
