## 2004 Steven Underhill:

**Twins in Contemporary Literature and Culture** Juliana De Nooy, 2005-06-21 Stories of twins are told with astonishing frequency in contemporary culture. Films and novels from recent decades repeatedly tell of the stranglehold of brotherly love, the evil twin who steals her sister's lover, the homicidal mutant twin, the reunion of twins separated at birth, warring twins, and confusion between look-alikes. **Twins in Contemporary Literature and Culture** asks why we keep telling twin tales and how these have been transformed in recent retellings to reflect the preoccupations of the times. **May the Armed Forces Be**

**with You** Stephen Dedman, 2016-09-02 Science fiction and the United States military often inhabit the same imaginative space. Weapons technology has taken inspiration from science fiction, from the bazooka and the atomic bomb to weaponized lasers and drones. Star-spangled superheroes sold war bonds in comic books sent to GIs during World War II and adorned the noses of bombers. The same superheroes now appear in big budget movies, made with military assistance, fighting evil in today's war zones. A missile shield of laser satellites dreamed up by writers and embraced by the high command is partially credited with ending the Cold War. Sci-fi themes and imagery are used to sell weapons programs, military service, and wars to the public. Some science fiction creators have willingly cooperated with the military; others have been conscripted. Some have used the genre as a forum for protest. This book examines the relationship between the U.S. military and science fiction through more than 80 years of novels, comics, films, and television series, including *Captain America*, *Starship Troopers*, *The Twilight Zone*, *Dr. Strangelove*, *Star Trek*, *Iron Man*, *Bill the Galactic Hero*, *The Forever War*, *Star Wars*, *Aliens*, *Ender's Game*, *Space Above and Beyond*, and *Old Man's War*. *Dialectics and the Sublime in Underhill's Mysticism* Peter Chong-Beng

Gan, 2015-04-29 This book represents a study of Evelyn Underhill's premier work on mysticism using Hegel's dialectics and Kant's theory of the sublime as interpretive tools. It especially focuses on two prominent features of Underhill's text: the description of the mystical life as one permeated by an intense love between the mystic and infinite reality, and the detailed delineation of stages of mystical development. Given these two features, the text lends itself to a construction of a valuable discourse predicated on dialecticism, sublimity, and mysticism. The book also articulates a number of insights into the content and nature of the writings of Christian mystics. **The Routledge Handbook of Magazine Research** David

Abrahamson, Marcia R. Prior-Miller, 2015-06-05 Scholarly engagement with the magazine form has in the last two decades produced a substantial amount of valuable research. Authored by leading academic authorities in the study of magazines, the chapters in *The Routledge Handbook of Magazine Research* not only create an architecture to organize and archive the developing field of magazine research but also suggest new avenues of future investigation. Each of 33 chapters surveys the last 20 years of scholarship in its subject area, identifying the major research themes, theoretical developments, and interpretive breakthroughs. Exploration of the digital challenges and opportunities which currently face the magazine world are woven throughout, offering readers a deeper understanding of the magazine form as well as of the sociocultural realities

it both mirrors and influences The book includes six sections Methodologies and structures presents theories and models for magazine research in an evolving global context Magazine publishing the people and the work introduces the roles and practices of those involved in the editorial and business sides of magazine publishing Magazines as textual communication surveys the field of contemporary magazines across a range of theoretical perspectives subjects genre and format questions Magazines as visual communication explores cover design photography illustrations and interactivity Pedagogical and curricular perspectives offers insights on undergraduate and graduate teaching topics in magazine research The future of the magazine form speculates on the changing nature of magazine research via its environmental effects audience and transforming platforms
