

Pre-Wired Raceway

Save Time on-site with Ready-to-Install Pre-Wired Systems

Mono-Systems, Inc. now offers many of our standard steel, aluminum, and PVC raceways in custom, pre-wired configurations. Each pre-wired system is factory cut to length, wired, assembled, and tested. Every aspect of the system, including dimensions, device types, circuiting and labeling, are designed to meet all project specifications, and plans. Runs are securely packaged, and clearly marked by floor, room, and run number for delivery to the job site.

Leads are individually marked with the panel and circuit number, ensuring field connection is fast, and accurate.

Raceways are pre-wired with the type and NEMA configuration that the project requires.

Optional device labeling is available in permanent adhesive, plastic, engraved, and other industry specified standards.

Mono-Systems offers pre-wiring in most standard raceway offerings. Whether a project requires Steel, Aluminum, or Non-Metallic, a full line of accessories, components, and fittings are available to ensure a complete system.

Our data cover plate options allow for a wide variety of commercially available data ports to be installed into the raceway, providing maximum flexibility.

Modular cover plate lengths make future field changes a snap. Our pre-wired systems utilize standard raceway components, so most parts are available from stock.
