**Methods for the Analysis of Stone Artefacts** Yvonne Tafelmaier, Guido Bataille, Viola Schmid, Andreas Taller, Manuel Will, 2023-01-13 This essential gives an overview of current methods of analysis of stone artefacts ranging from attribute analysis of entire inventories to microscopic analyses of traces of use of individual artefacts The presented approaches show the range of analysis of prehistoric stone artefacts in the German speaking area Simple examples of application illustrate the possibilities and limitations of each method The content and structure of the essentials is identical to teaching units for learning methods of stone artefact analysis at the University of T bingen in the Department of Early Prehistory

**How To Think Like a Neandertal** Thomas Wynn, Frederick L. Coolidge, 2012-01-26 In this book the authors provide a fascinating narrative of the mental life of Neandertals to the extent that it can be reconstructed from fossil and archaeological remains

*Le concept Levallois* Eric Boëda, 1994 **Transitions Before the Transition** Erella Hovers, Steven Kuhn, 2007-01-06 Modern human origins and the fate of the Neanderthals are arguably the most compelling and contentious arenas in paleoanthropology The much discussed split between advocates of a single early emergence of anatomically modern humans in sub Saharan Africa and supporters of various regional continuity positions is only part of the picture Equally if not more important are questions surrounding the origins of modern behavior and the relationships between anatomical and behavioral changes that occurred during the past 200 000 years Although modern humans as a species may be defined in terms of their skeletal anatomy it is their behavior and the social and cognitive structures that support that behavior which most clearly distinguish Homo sapiens from earlier forms of humans This book assembles researchers working in Eurasia and Africa to discuss the archaeological record of the Middle Paleolithic and the

Middle Stone Age This is a time period when Homo sapiens last shared the world with other species and during which patterns of behavior characteristic of modern humans developed and coalesced Contributions to this volume query and challenge some current notions about the tempo and mode of cultural evolution and about the processes that underlie the emergence of modern behavior The papers focus on several fundamental questions Do typical elements of modern human behavior appear suddenly or are there earlier archaeological precursors of them Are the archaeological records of the Middle Paleolithic and Middle Stone Age unchanging and monotonous or are there detectable evolutionary trends within these periods Coming to diverse conclusions the papers in this volume open up new avenues to thinking about this crucial interval in human evolutionary history

**Lithic Materials and Paleolithic Societies** Brian Adams, Brooke Blades, 2009-05-06  
Lithic Materials and Paleolithic Societies provides a detailed examination of the Paleolithic procurement and utilization of the most durable material in the worldwide archaeological record The volume addresses sites ranging in age from some of the earliest hominin occupations in eastern and southern Africa to late Pleistocene and post Pleistocene occupations in North American and Australia The Early Paleolithic in India and the Near East the Middle Paleolithic in Europe and the Late Paleolithic in Europe and eastern Asia are also considered The authors include established researchers who provide important synthetic statements updated with new information Recent data are reported often by younger scholars who are becoming respected members of the international research community The authors represent research traditions from nine countries and therefore provide insight into the scholarly present as well as the Paleolithic past Attempts are frequently made to relate lithic procurement and utilization to the organization of societies and even broader concerns of hominin behaviour The volume re evaluates existing interpretations in some instances by updating previous work of the authors and offers provocative new interpretations that at times call into question some basic assumptions of the Paleolithic This book will be invaluable reading for advanced students and researchers in the fields of palaeolithic archaeology geoarchaeology and anthropology

**Learning Among Neanderthals and Palaeolithic Modern Humans** Yoshihiro Nishiaki, Olaf Jöris, 2019-11-27 This book is based on the research performed for the Replacement of Neanderthals by Modern Humans Project The central issue of the project is the investigation of possible differences between the two populations in cognitive ability for learning The project aims to evaluate a unique working hypothesis coined as the learning hypothesis which postulates that differences in learning eventually resulted in the replacement of those populations The book deals with relevant archaeological records to understand the learning behaviours of Neanderthals and modern humans Learning behaviours are conditioned by numerous factors including not only cognitive ability but also cultural traditions social structure population size and life history The book addresses the issues in two parts comparing learning behaviours in terms of cognitive ability and social environments respectively Collectively it provides new insights into the behavioural characteristics of Neanderthals and modern humans from a previously overlooked perspective Furthermore it highlights the

significance of understanding learning in prehistory the driving force for any development of culture and technology among human society

**The Neanderthal Legacy** Paul A. Mellars, 2015-07-28 The Neanderthals populated western Europe from nearly 250 000 to 30 000 years ago when they disappeared from the archaeological record In turn populations of anatomically modern humans Homo sapiens came to dominate the area Seeking to understand the nature of this replacement which has become a hotly debated issue Paul Mellars brings together an unprecedented amount of information on the behavior of Neanderthals His comprehensive overview ranges from the evidence of tool manufacture and related patterns of lithic technology through the issues of subsistence and settlement patterns to the more controversial evidence for social organization cognition and intelligence Mellars argues that previous attempts to characterize Neanderthal behavior as either modern or ape like are both overstatements We can better comprehend the replacement of Neanderthals he maintains by concentrating on the social and demographic structure of Neanderthal populations and on their specific adaptations to the harsh ecological conditions of the last glaciatio Mellars s approach to these issues is grounded firmly in his archaeological evidence He illustrates the implications of these findings by drawing from the methods of comparative socioecology primate studies and Pleistocene paleoecology The book provides a detailed review of the climatic and environmental background to Neanderthal occupation in Europe and of the currently topical issues of the behavioral and biological transition from Neanderthal to fully modern populations

**Le Pacifique de 5000 À 2000 Avant Le Présent** Jean-Christophe Galipaud, Ian Lilley, 1999

**Stone Tools and the Evolution of Human Cognition** April Nowell, Iain Davidson, 2010-04-15 Dating as far back as 2 5 2 7 million years ago stone tools were used in cutting up animals woodworking and preparing vegetable matter Today lithic remains give archaeologists insight into the forethought planning and enhanced working memory of our early ancestors Contributors focus on multiple ways in which archaeologists can investigate the relationship between tools and the evolving human mind including joint attention pattern recognition memory usage and the emergence of language

**Settlement Dynamics of the Middle Paleolithic and Middle Stone Age** Nicholas John Conard, 2001

New Approaches to the Study of Early Upper Paleolithic 'transitional' Industries in Western Eurasia Julien Riel-Salvatore, Geoffrey A. Clark, 2007 New Approaches to the Study of Early Upper Paleolithic Transitional Industries in Western Eurasia Edited by Julien Riel Salvatore and Geoffrey A

**Quaternaria Nova**, 1996 *More Than Meets the Eye*

A. Nigel Goring-Morris, Anna Belfer-Cohen, 2003 These twenty three papers focus on recent research into the Upper Palaeolithic of the Levant a murky period of human history ca 45 000 to 20 000 years ago during which modern patterns of human behaviour and communication became the norm The vast majority of archaeological data from this period relates to chipped stone tools and most contributors focus on defining and distinguishing the two main traditions in lithic technology the Levantine Aurignacian and the Ahmarian Some papers report on recent fieldwork others seek to define and explain reasons for variation and change in material culture Do lithic traditions represent different corporate groups of hunter

gatherers or can variation be explained by other factors such as adaptations to local landscapes and environments or changing patterns of mobility An appendix provides a comprehensive list of available Upper Palaeolithic 14C dates in the Near East Most of the papers derive from a conference session on the Levantine Upper Palaeolithic held as part of the Society for American Archaeology annual meeting in 2000

*Gestion des matières premières et comportements techniques dans le Middle Stone Age africain* David Pleurdeau, 2004 This study examines the lithic assemblage from a cave site Porc Epic located in Dire Dawa Ethiopia The assemblage is representative of the Middle Stone Age and documents an increased sophistication in lithic production with greater technological variability shown in the production of blades flakes bladelets points and so on

*Lithic Technology of Neolithic Syria* Yoshihiro Nishiaki, 2000 The analysis and interpretation of lithics and lithic technology is an important part of reconstructing cultural development in prehistoric societies

**BAR International Series**, 2001

*Sense and Nonsense in Homer* John B. Wilson, 2000 An examination of passages in Homeric texts which either present semantic or logical difficulties or are incoherent or inconsistent Extracts from the Iliad and the Odyssey are translated into English with a detailed analysis of ambiguous terms

**Journal of Anthropological Research**, 2016

**The Middle-Upper Paleolithic Transition in Israel** Josette Sarel, 2004 This work examines the problem of the Middle Upper Paleolithic transitional industry in Northern Israel It has generally been accepted that no such transition occurred here nevertheless many transitional sites yield rich deposits and recent discoveries of well stratified transitional industries in the Levant have led the author to reconsider this supposition If the enigmatic assemblages from Northern Israel share the same cultural background with the assemblages which have been derived from undisturbed layers the existence of the transitional industry in Northern Israel may be validated Through technological analysis the author undertakes the determination of the reduction strategies and the main tool types used in various assemblages and determines that two contemporaneous traditions occur in Israel the Middle Upper Paleolithic transition evolving into an early Upper Paleolithic in the North and a Southern transition defined by Monigal as an Initial Upper Paleolithic which evolves into the Ahmarian in the South leolithic which evolves into the Ahmarian in the South leolithic which evolves into the Ahmarian in the South leolithic which evolves into the Ahmarian in the South
