Concepts and Issues in School Choice Margaret D. Tannenbaum,1995 *School Choice in 2003* Krista Kafer,2004 This document discusses issues related to the historical development of school choice and its impact today Over the past 2 decades 9 states have adopted publicly funded voucher or tax credit programs 40 states and the District of Columbia have enacted charter school laws and others have established public school choice within and between school districts Momentum is building But despite these programs and the work of private philanthropy too many children remain in failing schools While the nation spends more than 422 billion each year on elementary and secondary education over half of the nation s low income fourth grade students cannot read at a basic level The document concludes that no one school can serve all students equally well Ultimately school choice is about enabling all parents to enroll their children in the schools public public charter private or home schools that best meet their individual needs School choice maximizes the benefits of America s sizable investment in education to ensure that all children have an opportunity to succeed The following sections are included in this document 1 The Rise of Voucher Programs 2 The Development of Charter Schools 3 Home Schooling 4 Tax Incentives for School Choice 5 Legal Challenges to Choice Programs 6 The Post Zelman Legal Era 7 Privately Financed Voucher Programs 8 Recent Developments in School Choice and 9 Conclusion Contains 101 footnotes **Exploring the School Choice**

 Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000
Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today's education system seems more concerned with producing good employees than good citizens Meanwhile our country's diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today's leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future *Religious Education*, 1929 Available on microfilm from University Microfilms **Changing Urban Education** Clarence Nathan Stone, 1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation's leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the

profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future

Black Social Capital Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult

to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore's African American community as each has tried to rescue a failing school system. Examining the interplay between government and society, Orr presents the first systematic analysis of social capital both within the African American community, black social capital, and outside it where social capital crosses racial lines. Orr shows that while black social capital may have created solidarity against white domination in Baltimore, it hampered African American leaders' capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform. Orr examines social capital at the neighborhood level, in elite level interactions, and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform. He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital. The book features case studies of school reform activity, including the first analysis of the politics surrounding Baltimore's decision to hire a private for-profit firm to operate nine of its public schools. These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization, site-based management, and other reform alternatives. Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools. *Black Social Capital* offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change.
