Conception Of Value

Hannah Robie Sewall

Conception Of Value:

The Conception of Value H. Paul Grice, 2001 The works of Paul Grice collected in this volume present his metaphysical defence of value and represent a modern attempt to provide a metaphysical foundation for value Value judgements are viewed as objective value is part of the world we live in but nonetheless is constructed by us We inherit or seem to inherit the Aristotelian world in which objects and creatures are characterized in terms of what they are supposed to do We are thereby enabled to evaluate by reference to function and finality This much is not surprising The most striking part of Grice's position however is his contention that the legitimacy of such evaluations rests ultimately on an argument for absolute value The collection includes Grice's three previously unpublished Carus Lectures on the conception of value a section of his Reply to Richards previously published in Grandy and Warner eds *Philosophical Grounds of Rationality* Oxford 1986 and *Method in Philosophical Psychology* Presidential Address delivered to the Annual Meeting of the American Philosophical Association 1975

The Concepts of Value L. Aschenbrenner, 2012-12-06 The task of presenting for explicit view the store of appraisive terms our language affords has been undertaken in the conviction that it will be of interest not only to ethics and other philosophical studies but also to various areas of social science and linguistics I have principally sought to do justice to the complexities of this vocabulary the uses to which it is put and the capacities its use reflects I have given little thought to whether the inquiry was philosophical and whether it was being conducted in a philosophical manner Foremost in my thoughts were the tasks that appeared to need doing among them these explicit attention was to be given to the vocabulary by means of which we say we commend judge appraise or evaluate subjects and subject matters in our experience it was to be segregated from other language at least for the purpose of study the types of appraisive resources that are at hand in a language such as English were to be classified in some convincing and not too artificial manner and an empirical standpoint was to be developed for a better view of appraisal evaluation and judging within the framework of other ways we have of responding to our surroundings such as appetite and emotion on one side and factual registering and theorizing about states of affairs on the other Such an inquiry has never been undertaken in quite this manner before

Introduction to Value Theory Nicholas Rescher, 1969 *General Theory of Value* Ralph Barton Perry, 1926 *Real Estate Valuation Theory* Manya M. Mooya, 2016-03-17 This monograph critically reviews and updates real estate valuation theory which is based on neoclassical economics in light of developments in heterodox economic theory Building on a comprehensive historical account of the evolution of value theory the book uses new institutional economics theory and critical realism as lenses through which problems in standard valuation theory and practice are expatiated and as the foundation for an alternative theory The new theory is employed to explain major problems in real estate valuation that are beyond the capability of the standard theory such as price bubbles in real estate markets anchoring bias client influence and valuation under uncertain market conditions

The Theory of Value Before Adam Smith Hannah Robie Sewall, 1901 **Value-theory and**

Criticism Orlie Pell,1930 *Morals by Agreement* David Gauthier,1987-05-21 In this book the author argues that moral principles are principles of rational choice According to the usual view of choice a rational person selects what is likely to give the greatest expectation of value or utility But in many situations if each person chooses in this way everyone will be worse off than need be Instead Professor Gauthier proposes a principle whereby choice is made on an agreed basis of co operation rather than according to what would give the individual the greatest expectation of value He shows that such a principle not only ensures mutual benefit and fairness thus satisfying the standards of morality but also that each person may actually expect greater utility by adhering to morality even though the choice did not have that end primarily in view In resolving what may appear to be a paradox the author establishes morals on the firm foundation of reason *Sociological Theory, Values, and Sociocultural Change* Edward A. Tiryakian,2013-06-30 This volume brings together some of the biggest names in the field of sociology to celebrate the work of Pitirim A Sorokin professor and founder of the department of sociology at Harvard University Sorokin a past president of the American Sociological Association was a pioneer in many fields of research including sociological theory social philosophy methodology and sociology of science law art and knowledge Edward A Tiryakian s updated introduction examines major factors inside and outside sociology that have led to new appreciation of Sorokin s contributions and scholarship and demonstrates their continued relevance This new edition also includes an updated bibliography of works by and about Sorokin The volume includes Arthur K Davis who describes Sorokin s importance as a teacher in the Socratic tradition Talcott Parsons examines internal differentiation in Christianity in its historical Western development Thomas O Dea deals with the institutionalization of religious values Walter Firey examines how actors relate their conception of a distant future to their present behavior Florence Kluckhohn focuses upon the problem of cultural variations within a social system Robert K Merton and Elinor Barber examine the sociological aspect of ambivalence Bernard Barber considers the American business s efforts to institutionalize professionalism Other contributors include Charles P Loomis Wilbert E Moore Georges Gurvitch Marion J Levy Jr Nicholas S Timasheff Carle Zimmerman and Logan Wilson This volume is an essential collection of essays concerning the work of one of the most prominent thinkers in twentieth century sociology *The Place of Abstinence in the Theory of Interest* Thomas Nixon Carver,1893 *Annals of the American Academy of Political and Social Science* ,1914 *Essays on Marx's Theory of Value* I.I. Rubin,2014 Economist theorist and historian the author suggests a definition of political economy which has nothing in common with the definition of economics He states that political economy deals with human working activity not from the standpoint of its technical methods and instruments of labor but from the standpoint of its social form **The American Economic Review** ,1912 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association **Economics and social regulation** ,1908 **The Theory of Marginal Value** Laurits Vilhelm Birck,1922 **Value Theory** Deshun Li,2013-07-12 Humankind s progress has always

been driven by two momentums the pursuit of truth and the creation of value But our understanding of value and our ability to reflect on its complexity has long lagged behind our constant search for truth This has in turn limited our grasp of the essence of truth This book takes philosophical contemplations on value to a new level while also explicating some contemporary Chinese styles of philosophical thought Over the past 25 years this book has been having an increasing impact on Chinese readers and researchers and it also provides a good platform for international dialogue on several key issues of philosophical studies
