Cell Membranes Methods And Reviews Volume 2:

Current Catalog National Library of Medicine (U.S.), *Methods of Biochemical Analysis* David Glick, 2009-09-25
Biochemical analysis is a rapidly expanding field and is a key component of modern drug discovery and research. *Methods of Biochemical Analysis* provides a periodic and authoritative review of the latest achievements in biochemical analysis. Founded in 1954 by Professor David Glick, *Methods of Biochemical Analysis* provides a timely review of the latest developments in the field.

National Library of Medicine Current Catalog National Library of Medicine (U.S.), *Transport And Diffusion Across Cell Membranes* Wilfred Stein, 2012-12-02
Transport and Diffusion across Cell Membranes is a comprehensive treatment of the transport and diffusion of molecules and ions across cell membranes. This book shows that the same kinetic equations with appropriate modification can describe all the specialized membrane transport systems: the pores, the carriers, and the two classes of pumps. The kinetic formalism is developed step by step, and the features that make a system effective in carrying out its biological role are highlighted. This book is organized into six chapters and begins with an introduction to the structure and dynamics of cell membranes, followed by a discussion on how the membrane acts as a barrier to the transmembrane diffusion of molecules and ions. The following chapters focus on the role of the membrane's protein components in facilitating transmembrane diffusion of specific molecules and ions; measurements of diffusion through pores and the kinetics of diffusion and the structure of such pores and their biological regulation. This book methodically introduces the reader to the carriers of cell membranes, the kinetics of facilitated diffusion, and cotransport systems. The primary active transport systems are considered, emphasizing the pumping of an ion (sodium, potassium, calcium, or proton) against its electrochemical gradient during the coupled progress of a chemical reaction, while a conformational change of the pump enzyme takes place. This book is of interest to advanced undergraduate students as well as to graduate students and researchers in biochemistry, physiology, pharmacology, and biophysics.

Books in Print, 1994 **Cell Membranes Methods and Reviews** Elliot Elson, 1983-05-01
Cell Membranes Methods and Reviews is the continuation of a distinguished series of books edited by Edward Kom under the title *Methods in Membrane Biology*. While the original series nominally dealt with methods for the study of membranes, its chapters were in fact much broader and covered the conceptual framework upon which the methods were based, as well as the methodology per se. In continuing this series, we changed the title to reflect this broader point of view. We hope to present a series of volumes published at roughly annual intervals, containing comprehensive reviews dealing with various aspects of membrane biochemistry. We will, on occasion, also include short chapters that deal exclusively with new methods and their applications. The biology of membranes, as we view it, is very broad, and we hope therefore not only to include work that is directly related to molecules present in membranes, but also to treat molecules that interact with membrane components. In each of the volumes, we hope to have one or two areas of concentration and to include chapters that collectively present a balanced and comprehensive review of those particular fields. In

this first volume we have concentrated on transport of solutes across the membrane We are grateful to the authors who have provided us with excellent and comprehensive chapters in these areas in a timely fashion *Revue Roumaine de Biochimie*, 1986 *The Cell in Contact* Gerald M. Edelman, Jean-Paul Thiery, 1985 This volume which results from a conference held at the Neurosciences Institute addresses a central issue in developmental biology that is of particular relevance to the formation of the nervous system It focuses on cell adhesion molecules substrate adhesion molecules and cell junctional molecules on the regulation of their expression and on their roles in key events during embryological development

Neurobiology of Taste and Smell Thomas E. Finger, Wayne L. Silver, 1991 An introduction and overview of the chemical senses from single cell organisms to vertebrates including man this book is directed at the non specialist who may be familiar with other aspects of neurobiology but lacks knowledge of the chemical senses **Federation Proceedings** Federation of American Societies for Experimental Biology, 1985 Subject Guide to Books in Print, 1991 *Proceedings of the National Academy of Sciences of the United States of America* National Academy of Sciences (U.S.), 2001 **The FASEB Journal**, 1987 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1978 Methods in Bioengineering Kaushal Rege, Igor L. Medintz, 2009 This practical book is part of the new Artech House Methods in Bioengineering series volumes designed to offer detailed guidance on authoritative methods for addressing specific bioengineering challenges This volume is focused on the materials involved with nanoscale bioengineering Nanomaterials are quickly moving into the mainstream as a critical component of biological research Filling a critical gap in the current literature this new resource presents practical step by step methods to help professionals synthesize characterize functionalize and apply the nanomaterial that is most suitable for handling a given nanoscale bioengineering problem Written and presented by the best scientists and engineers in their respective fields the authors offer a clear and detailed understanding of how to carry out a wide range of important methods in this area Choice, 1983 **Medical Books and Serials in Print**, 1984 **Cell Membranes**, 1990 Medical and Health Care Books and Serials in Print, 1997 Structure & Properties of Cell Membranes Gheorghe Benga, 1985-11-13 Band 2
