Cgfft Method:

The CG-FFT Method Manuel F. Catedra,1995 This work presents a comprehensive description of the basic principles and practical application of the conjugate gradient method in combination with fast Fourier transform CG FFT It provides extensive fundamental analyses of basic spectral methods and conjugate gradient methods The presentation details the relationship between applied electromagnetics and linear system theory for the analysis of radiation and scattering from two dimensional and three dimensional bodies with arbitrary geometry and material composition plane multilayer or volumetric periodic structures and metallic patches defined over body of revolution BOR surfaces

Modern Characterization of Electromagnetic Systems and its Associated Metrology Tapan K. Sarkar, Magdalena Salazar-Palma, Ming Da Zhu, Heng Chen,2021-08-24 New method for the characterization of electromagnetic wave dynamics Modern Characterization of Electromagnetic Systems introduces a new method of characterizing electromagnetic wave dynamics and measurements based on modern computational and digital signal processing techniques The techniques are described in terms of both principle and practice so readers understand what they can achieve by utilizing them Additionally modern signal processing algorithms are introduced in order to enhance the resolution and extract information from electromagnetic systems including where it is not currently possible For example the author addresses the generation of non minimum phase or transient response when given amplitude only data Presents modern computational concepts in electromagnetic system characterization Describes a solution to the generation of non minimum phase from amplitude only data Covers model based parameter estimation and planar near field to far field transformation as well as spherical near field to far field transformation Modern Characterization of Electromagnetic Systems is ideal for graduate students researchers and professionals working in the area of antenna measurement and design It introduces and explains a new process related to their work efforts and studies
