test of time **The Lever of Riches** Joel Mokyr,1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

African American Literary Criticism, 1773 to 2000 Hazel Arnett Ervin,1999 What is African American literary art Is it functional or propaganda or is it art for art s sake What are the responsibilities of African American writers to their art forms to themselves and to their audiences And what are the responsibilities of the audiences Who shall judge it and by what criteria shall it be judged In African American Literary Criticism 1773 to 2000 Hazel Arnett Ervin has assembled 60 critical statements that address these questions ranging from public addresses to literary manifestos and credos letters journal entries interviews reviews and studies by thinkers who have analyzed and evaluated literature and developed theory Authors include W E B Du Bois Charles Chesnutt Langston Hughes Ann Petry Richard Wright James Baldwin Ralph Ellison Amiri Baraka Toni Morrison Houston Baker Henry Louis Gates Alice Walker bell hooks and many others Each statement is preceded by a short headnote annotating the writer s thesis and setting the tone for critical reading and thinking following each statement is a list of sources for further study on the topic For scholars students and critics who are interested in

ongoing discussions not only about the function of art the role of the writer and the artistic responsibility of the audience but also about the epistemology aesthetics and methodology within a vibrant literary tradition this reader is an essential source
