DeMartini, Martin I. Gallegos, Lauren Altenburger, Nicola Carone, 2024-12-12 Significant contextual changes over the past few decades have suggested that mother focused models of science do not accurately capture fathers involvement as caregivers and coparents

Extant research such as the study from Cabrera and their team in 2018 has debunked myths that paint fathers solely as secondary caregivers hands off parents and absent fathers On the contrary recent studies have suggested that fathers exert significant direct and indirect influences on child development and partner relationship quality via coparenting how parents work with or against each other to care for their children e g the studies from Farr Kuo and their team in 2017 McHale and their team in 2019 Murphy and their team in 2017 and Schoppe Sullivan Fagan in 2020 According to McHale and their team s research in 2019 coparenting has been of interest to family systems researchers clinicians as well as intervention and preventionists due to this construct capturing whole family dynamics While much of coparenting literature has focused on gender differences in the roles and involvement of opposite sex coparents such as the research from Carone Lingiardi in 2022 However we know less about coparenting in alternative family structures particularly gay father coparents as mothers are heavily emphasized in extant literature
