Distinction and the Criticism of Beliefs Alfred Sidgwick,1892      **The Politics of God** Kathryn Tanner,2022 Thirty years ago Kathryn Tanner put forward a daring proposal Traditional Christian theologies she insisted can be a source of political transformation rather than a sponsor of the status quo Through a rigorous analysis of Christian beliefs in their historical theological and social diversity Tanner connects belief to attitudes and action and shows how doctrines can relate to each other to social systems and to ethical behavior Drawing on the theologies of divine transcendence and creation that animate and organize so much of her work The Politics of God frees traditional theology from its captivity to unjust rulers and systems and unleashes its radical potential for liberation empowerment and the pursuit of a just society This anniversary edition includes a major new preface in which Tanner addresses the changes in the social and political situation that have accumulated in the decades since the book s publication and resituates her argument for a new generation of theologians and activists

**Thought and Things: Experimental logic, or genetic theory of thought** James Mark Baldwin,1908

*Sensorimotor Psychotherapy* Pat Ogden,Janina Fisher,2015-04-27 A book for clinicians and clients to use together that explains key concepts of body psychotherapy The body s intelligence is largely an untapped resource in psychotherapy yet the story told by the somatic narrative gesture posture prosody facial expressions eye gaze and movement is arguably more significant than the story told by the words The language of the body communicates implicit meanings and reveals the legacy of trauma and of early or forgotten dynamics with attachment figures To omit the body as a target of therapeutic action is an unfortunate oversight that deprives clients of a vital avenue of self knowledge and change Written for therapists and clients to explore together in therapy this book is a practical guide to the language of the body It begins with a section that orients

therapists and clients to the volume and how to use it followed by an overview of the role of the brain and the use of mindfulness The last three sections are organized according to a phase approach to therapy focusing first on developing personal resources particularly somatic ones second on utilizing a bottom up somatic approach to memory and third on exploring the impact of attachment on procedural learning emotional biases and cognitive distortions Each chapter is accompanied by a guide to help therapists apply the chapter s teachings in clinical practice and by worksheets to help clients integrate the material on a personal level The concepts interventions and worksheets introduced in this book are designed as an adjunct to and in support of other methods of treatment rather than as a stand alone treatment or manualized approach By drawing on the therapeutic relationship and adjusting interventions to the particular needs of each client thoughtful attention to what is being spoken beneath the words through the body can heighten the intimacy of the therapist client journey and help change take place more easily in the hidden recesses of the self
